Bulbs *from* Holland

Bulbs from Holland *Imported by Wayside Gardens*

PRICE REDUCTIONS!

A SUBSTANTIAL part of the phenomenal crop of Tulip bulbs harvested in Holland last summer (1938) was replanted in the autumn of that year. The result is a very considerable reduction in prices, particularly noticeable among the better varieties.

These low prices will not prevail for long. We, therefore, urge you make this a Tulip-buying year.

Do over your old plantings, stock up and take advantage of an opportunity which rarely presents itself.

QUALITY

The enviable reputation we enjoy is known to most gardeners. It is constantly strived for by giving faithful service and sending faultless quality.

Quality perhaps is the most important of the two and happily we can do more than most in that respect, because the secretary of our company is a member of the firm of Grullemans in Holland, internationally known as the finest growers of bulbs, whose early business years were spent with that firm, obtaining an intimate knowledge about bulbs, an opportunity which does not present itself to the average American importer who consequently is not as well informed.

Buy your bulbs from **Wayside Gardens** and see the difference!

GUARANTEE

We guarantee every bulb we send out to be in first class condition in every respect, of top size, and true to name. We further guarantee that all will bloom for you if you will give them reasonable care and carry out our cultural instructions which are enclosed with every order. Your money will be refunded or new bulbs sent if they do not come up to our claims or your expectations.

We guarantee safe arrival to all points within the United States, and upon your notice will replace immediately any damaged bulbs, at our expense.

A like guarantee is, we believe, not made by any other firm in America. It is only possible because the bulbs we sell are the choicest obtainable, imported from the best and most critical grower in the world.

5% Discount If You Order Bulbs Before August First

If you send cash with your order you may take an extra 2 per cent discount. Should it not be convenient to enclose a check, and you still want to order before August 1st, taking advantage of 5 per cent saving for early buying, send your order now and we will forward all orders under \$10.00 C. O. D. at planting time.

We shall be glad to open charge accounts when desired for amounts over \$10.00. In this case please send bank or trade references with your order.

IMPORTED DUTCH CHEESE

October is *the month* when the finest cheese is made in Holland. It is possible only from October cream to make that superlative quality, marvelous for its flavor as well as texture and richest in butter fats. Few people in this country know of it. Some fortunate person traveling in Holland may have encountered these cheeses, but they are not generally offered for sale, even in Holland. What are obtainable here in America are as a rule indifferent grades, bought to meet competition!

Each season produces about 5000 of these extraordinary quality cheeses. In the past most of them have been exported to South America where they are served at the fashionable hotels and clubs.

This year again with the co-operation of an old friend of our Secretary, Mr. Grullemans (a Hollander), we obtained "first call" on a substantial quantity of this famous cheese, thinking that many of our customers would like to taste and enjoy this choice delicacy once more.

Along with the quantity wanted for personal use, we shall be delighted to again import this famous cheese for anyone who will write us at once because our option expires Oct. 3rd. Therefore, we must have your request on or before Oct. 1st.

The average weight is $4\frac{1}{2}$ pounds. Each cheese comes packed in an individual carton and costs \$2.85 each, delivered. Slightly more than last year because of increased duty. (We take care of duty, freight, etc.). Delivery to you first week in December in ample time to use them as Christmas gifts.

If you are interested please advise us promptly. At once if possible.

The Time to Plant

ONE of the most often asked questions is: When is the right time to plant, the autumn or the spring? The answer to this question depends entirely on the material to be planted, the location it is to be planted in, and the time when the question is asked.

The autumn is the better time to handle all plant material of unquestioned hardiness. In the fall, weather and soil conditions, as a rule, are better than in the early spring. A little covering of excelsior or clean dry straw is all the winter protection required.

Do not let the first light frost in the fall stop your garden operations. Light frosts are a help rather than a hindrance.

Always remember that the best time to transplant any hardy plant or rock plant is when it is dormant. Most Hardy Plants are dormant

in our country early in September immediately after the hottest and driest days of the summer are over. Transplant them just before they commence their new fall growth. It is our practice to ship no plants or bulbs except at the season when they will give best results. If you lack experience, order early and leave the responsibility of shipping with us. We guarantee results.

Every order in the autumn is carefully examined, material and location carefully considered, and shipment is made only of such material as can be transplanted in your part of the country at that particular time. If your order contains plants or bulbs which are better planted in the spring they are carried over by us and sent to you in the spring. This work of examining is not left to employees; it is done by a responsible official of the company with many years of experience.

Plant Alpine and Herbaceous Plants from September 1st to November 1st. Roses from October 15th to December 1st. Peonies, German and Japanese Iris from September 1st to frost. Oriental Poppies and Pyrethrums from August 15th to October 15th. Dutch bulbs from October 1st until ground is frozen. Madonna Lilies from August 15th to November 1st. All other Lilies immediately when received.

Autumn Planting Guaranteed

Inasmuch as the autumn is the better time to plant most Hardy Plants, we urge you do all planting possible from September 15th to end of October. We will replace free of charge the following spring plants sent you this fall that might be winter-killed. We assume all responsibility, but of course, you will give them the required care and protection and not hold us responsible for personal carelessness or neglect. When reporting losses in spring mention order number, please.

Only a limited number of plants are offered in this bulb catalog. If you do not have our Plant catalog we will gladly forward a copy. Please include in letter of request five 3-cent stamps to cover forwarding charges. Or drop a postal card and book will be sent by express, 25c collect. Incomparabilis Narcissus, Helios

Incomparabilis Narcissus, Fortune

Leedsi Narcissus, Evangeline

Incomparabilis Narcissi

Particularly Recommended in This Class is Yellow Poppy

Division 2: Incomparabilis, cup or crown measuring from one-third to nearly the length of the perianth segments.

***Bernardino** *Doz. \$1.15, 100 \$7.50*
Perianth cream colored, the frilled and fluted cup stained deep apricot-orange at its edge. A good hardy grower which forms nice clumps in a short time.

Brightling *Doz. \$1.90, 100 \$12.25*
Large and flat primrose-colored perianth; the expanded, flat orange cup has a double frilled margin of orange-red.

Carlton *Each \$0.55, Doz. \$5.75*
A most beautiful variety. Broad, overlapping, flat perianth with a large, expanded cup. The whole flower is of a soft uniform yellow. Very free flowering and a strong and sturdy grower. Fine for exhibition.

***Croesus** *Doz. \$1.25, 100 \$8.25*
Universally popular both for the garden and for exhibition; light canary-yellow perianth of perfect form, with outer petals nearly touching, the inner ones overlapping, opening flat; broad fluted cup of rich orange to base; substantial, free flowering, and a fine propagator. (Color illustration, page C.)

Dick Weiland *Each \$0.65, Doz. \$7.25*
The perianth is pure white and the cup a brilliant flame-orange. One of its most remarkable qualities is that the color does not fade but rather intensifies with age. The flower has unusual lasting qualities. Its greatest beauty lies in the startling contrast between petals and cup which makes it stand out even in the largest collection of Daffodils. An exhibition variety "par excellence." (Color illustration, page B.)

Dorine *Each \$0.45, Doz. \$4.75*
A very large flower and one of the best in this class. The perianth is pure white with broad petals. The cup is of good size and bright orange-scarlet color. An extremely showy variety of good form.

Fortune *Each \$2.00, Doz. \$20.00*
This is undoubtedly the most wonderful flower of recent introduction. It is a Giant Incomparabilis of the largest size, perfect form, and gorgeous color on a 2-foot stem; fine flat, overlapping perianth of great substance which stands boldly at right angles to the crown, of clear deep lemon-gold color with long bold crown of wonderful glowing coppery red-orange. It is of great substance, vigorous and very lasting—free bloomer.

***Francisca Drake** *Each \$0.40, Doz. \$4.25, 100 \$30.75*
The pure white perianth petals are of unusual substance, an inch and a half wide, and tinted gold at the base, which shows through on the outside; the cup, wide and deep, is golden yellow at the base; changing gradually to flame-orange at the densely frilled edge; the flowers are held well above the fine foliage and give the effect of a flock of white seagulls taking flight; strong growing and free flowering. (Color illustration, page A.)

Gallipoli *Each \$0.40, Doz. \$4.00, 100 \$28.25*
World-famous variety, citron-yellow perianth, cup deeply fluted to base and with a double frill effect at edges, is yellow, shading to vivid orange; somewhat drooping; very decorative.

***Helios** *Doz. \$1.35, 100 \$8.75*
A most refined flower. Creamy yellow perianth, star-shaped; pale orange cup, slightly frilled. A deliciously beautiful variety a clump of which placed near an evergreen would make an unusually interesting picture. Very early.

Golden Frilled *Doz. \$1.45, 100 \$9.50*
Perianth flat and overlapping; large, widely expanded cup, attractively frilled at the brim; clear yellow throughout.

***John Evelyn** *Doz. \$1.90, 100 \$12.25*
Outstanding among the new Incomparabilis hybrids; flatly opening perianth, 4 to 5 inches across, with a flat cup nearly 2 inches in diameter, densely frilled, the perianth being pure white without a trace of shading, and the cup lemon-yellow and fluted or shirred to the base; good neck; strong grower; free flowering and a good propagator; one of the greatest Daffodils. (Color illustration, page A.)

***Lucifer** *Doz. \$1.20, 100 \$7.75*
Perianth sulphur-white with long, well-rounded petals, starlike in effect; cup chrome-yellow edged bright orange. A showy flower for outdoors; it holds its color splendidly. Height 18 inches.

Lucinius *Doz. \$1.55, 100 \$10.25*
A self-colored, rich golden yellow flower of unusually good form and excellent substance. A very distinct type. It is one of the best golden yellow short cups.

Merkara *Each \$0.70, Doz. \$7.75*
Broad, overlapping yellow perianth and beautifully frilled cup of deep orange-red. A very large flower of superb form. One of the most strikingly beautiful varieties.

Milford-Haven *Each \$0.35, Doz. \$3.00, 100 \$20.75*
Fine flower with cream-white perianth and wide cup ruffled and deeply frilled at edge, chrome-yellow at base and shading into rich orange-scarlet, the same gorgeous color combination as in the Montbretia "His Majesty."

Monte Carlo *Each \$0.55, Doz. \$5.75*
A veritable giant in this class. Perianth 5 inches or more across, somewhat star-shaped, formed by the broad, overlapping but pointed petals. The huge, open cup is deep and nicely frilled. Entire flower is colored a fine, clear yellow. An outstanding variety.

New Amsterdam *Each \$0.95, Doz. \$10.75*
Large, flat perianth of almost pure white, with wide-open cup of soft orange-red, beautifully frilled at brim.

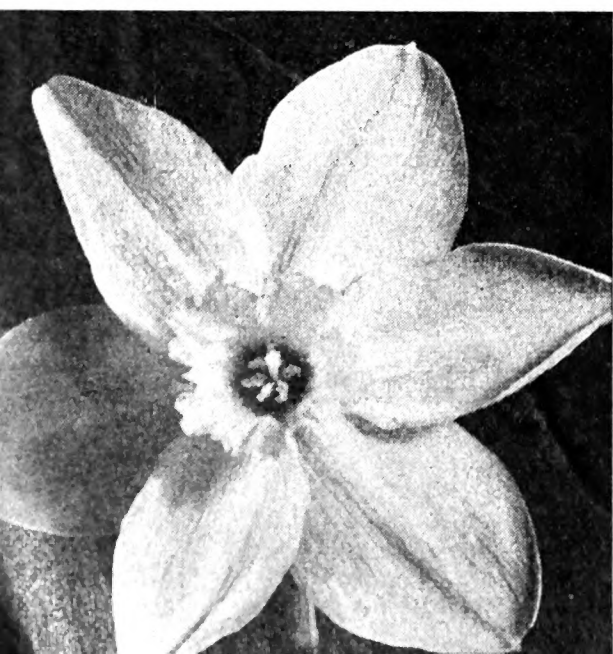

Orange Glow *Doz. \$3.75, 100 \$25.75*
Flowers are very large, with broad, flat yellow perianth often 5 inches across. The cup is deep glowing orange, beautifully frilled. Of fine proportions, this is an outstanding Daffodil.

Red Cross *Each \$0.35, Doz. \$2.60, 100 \$17.25*
Famous throughout the Daffodil world; extra large, strong flower, opening flat, primrose-yellow perianth, and deep yellow cup densely frilled, of deep orange; substantial and long lasting, and fine both in the garden and for exhibition.

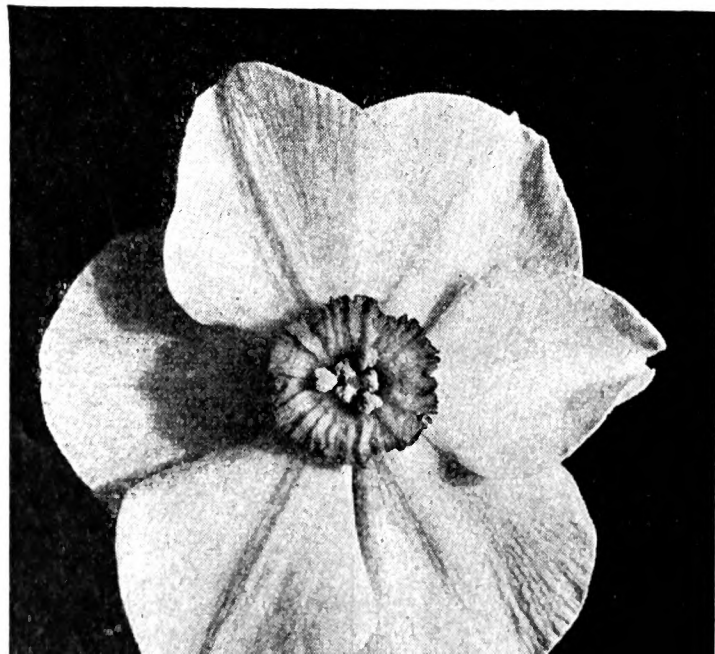

***Sir Watkin** *Doz. \$1.05, 100 \$7.00*
Perianth primrose-yellow; large and well-formed yellow cup; tinged deep yellow. A giant among the medium trumpets.

Yellow Poppy

Doz. \$1.40, 100 \$9.00

Among all the fine Daffodils of recent introduction, few have more quickly made a name for themselves—a flower of good size, with wide flaring trumpet, 1½ inches across, the whole flower being finely proportioned, and borne on a tall stem with a good neck; in color the perianth is pure yellow, and the cup of the same lovely shade deepening slightly at the frilled edge; conspicuous styles of the same shade as the perianth add to its beauty; outstanding and in every way a satisfactory, as well as a sensational flower, both in the garden and as a flower for cutting.

Barri Narcissus

Particularly Recommended in This Class is Nobility

Division 3: Barri, cup and crown measuring less than one-third the length of the perianth segments.

***Alcida**

Doz. \$1.90, 100 \$12.25

Yellow perianth, deep yellow cup with broad edge of orange-red. The petals are very long, giving the flower a distinct and outstanding character. A perfection in scarlet and gold. Long stems.

Bonfire

Doz. \$1.20, 100 \$8.00

Remarkable flower, entirely distinct, of perfect design and build; pure primrose perianth, outer petals so broad they nearly touch, and the three inner petals overlapping, forming a saucer-shaped perianth for the cup of deep fiery orange with the edge picoteed deep blood-red.

***Conspicuous**

Doz. \$1.15, 100 \$7.50

Large, broad, spreading perianth of soft yellow; short yellow cup, edged orange-scarlet. One of the most useful of all Daffodils. Splendid for the border or naturalizing. Height 21 inches.

***Diana Kasner**

Doz. \$1.45, 100 \$9.50

A pure white perianth and a large fluted yellow cup with blood-red frill, very free flowering and an excellent forcer. We consider this variety as one of our most valuable introductions and cannot recommend it too highly.

Large flower with flat, reflexed, broad-petaled overlapping perianth of pale primrose, changing to pure white; deeply frilled flat cup of primrose-yellow, with dainty orange picotee; extremely showy and a great favorite in the garden.

***Mrs. Walter Brewster**

Doz. \$2.05, 100 \$13.00

Fine reflexed perianth of pure white, flat cup, lemon-yellow edged with oxblood-red; fine lasting flower; one of the best.

Nobility

Doz. \$1.35, 100 \$8.75

The pure white and very flat perianth is somewhat star-shaped; the large bright orange eye lays perfectly flat against the perianth.

Red Beacon

Doz. \$1.20, 100 \$7.75

A most lovely flower which immediately attracts one by its brilliantly colored cup. The perianth is ivory-white, slightly shaded sulphur at the base. The cup is prettily fluted and of the most intense fiery orange-red.

Triandrus Hybrids

Particularly Recommended in This Class is Thalia

Division 5: These are the cyclamen-flowered Daffodils with reflexing perianth. The flowers are more or less drooping, of elegant form and graceful habit.

***Agnes Harvey** *Each \$0.30, Doz. \$2.50, 100 \$16.25*
A most dainty Daffodil of drooping habit, 1 to 3 flowers on a stem; white starry perianth with Triandrus type trumpet, of the same color, sometimes flushed faint apricot. A wonderful flower for naturalizing, especially near water, and also for cutting; desirable in every way.

Moonshine *Doz. \$2.35, 100 \$14.75*
A beautiful Triandrus hybrid, star-shaped white flowers, often three to a stem, drooping gracefully, very beautiful and a great favorite, especially for the rock garden or for naturalizing in the shade. A fine exhibition variety.

Mrs. Alfred Pearson *Each \$0.40, Doz. \$4.00, 100 \$28.25*
Dainty, star-shaped flowers in generous clusters; white perianth and pale primrose cup; new type from crossing a Leedsi and a Polyanthus; excellent for the rock garden.

Pearly Queen *Doz. \$2.05, 100 \$13.00*
Triandrus hybrid, 2 or 3 flowers to a stem; star-shaped, cream-white perianth, with clear lemon-yellow short trumpet; distinct pearly sheen provides the name; drooping habit; free flowering and a strong grower.

Queen of Spain *Each \$0.40, Doz. \$4.00, 100 \$28.25*
A wild hybrid discovered in Spain. One of the most beautiful, distinct, and graceful Daffodils and recommended either for pots and bowls or for naturalizing in woodlands, rock gardens, etc. The flowers vary slightly in size, and sometimes in form of trumpet, but all are of a soft, delicate canary-yellow, with a graceful reflexing perianth. Height 12 inches.

Shot Silk *Each \$0.40, Doz. \$4.25, 100 \$30.75*
A charming Triandrus Hybrid, three flowers to a stem. Perianth and cup uniform creamy white, slightly star-shaped, long narrow cup. This is undoubtedly the most graceful little Daffodil in this class and will appeal to all lovers of the smaller types.

***Thalia** *Doz. \$2.35, 100 \$14.75*
In addition to a peculiar attraction at first sight, this flower leaves one with an impression that it is white, yet it is a whiteness that is not white. The recurving petals and the angle of the three trumpets are unlike the conventional short-cupped Daffodil. The stem is dark green, round and reedlike thin. Some call it the "orchid-flowered" Narcissus which adds to the mystery. Thalia provides unusually good material for artistic arrangement. (Color illustration, page C.)

Jonquilla Hybrids

Particularly Recommended in This Class is Golden Sceptre

Division 7: Hybrid Jonquils with two or more, small, very fragrant flowers on one stem.

***Jonquilla Simplex (Queen Ann's Daffodil)** *Doz. \$1.00, 100 \$6.50*
The true tiny single Jonquil. The bulbs as well as the flowers of this miniature Daffodil are not very much larger than the Snowdrop. The flowers are a pure golden yellow and delightfully fragrant; foliage is grasslike. Perfectly hardy and most satisfactory small Daffodil for the rock garden.

***Jonquilla flore pleno** *Doz. \$1.30, 100 \$8.50*
This is the charming double-flowered form of the above. Also splendid in the rockery. The double Queen Ann's Daffodil.

***Campernelle, Single** *Doz. \$1.20, 100 \$7.75*
A tiny golden Daffodil with tips of pointed grasslike foliage reaching above the flowers; the broad overlapping petals make a nicely rounded perianth; frequently three blooms on a stalk; a delightful little flower.

Campernelle, Double *Doz. \$1.25, 100 \$8.25*
Two to three golden yellow, small, fragrant flowers on strong stems; lovely for cutting. Height 13 inches.

Lady Hillingdon *Each \$0.50, Doz. \$5.25, 100 \$41.25*
A fine companion for Golden Sceptre, blooming earlier; cluster-flowering type, but well worth growing even if all the flowers came singly; perianth a clear butter-yellow, with broad outer petals opening flat like those of a Trillium, with the narrow inner petals curving forward around the moderate-sized shapely trumpet of deep Jonquil yellow.

***Golden Sceptre** *Doz. \$1.20, 100 \$8.00*
A medium sized perfectly built flower of deep Jonquil-yellow, 3 inches or more in diameter. The whole flower, as with the others in this class, is of the greatest substance, keeping in perfect condition exceptionally long both in the garden and when cut.

Odorus, Orange Queen *Doz. \$1.70, 100 \$11.00*
A very striking variety, 2 to 3 flowers on a stem, color intense golden orange, cup prettily fluted. Delightful Jonquil fragrance. The flowers are produced in the greatest profusion on wiry stems about level with the tops of the strong but not coarse foliage; truly a Daffodil for every garden and the gayest of the lot, large or small.

***Tullus Hostilius** *Doz. \$1.75, 100 \$11.25*
Of the Jonquil-yellow trumpet type; strong growing flower of remarkable substance, lasting exceptionally long in the garden or when cut; an ideal Daffodil for informal use and for the large rock garden.

White Wedgewood *Each \$0.50, Doz. \$5.25, 100 \$41.25*
A dainty and charming flower borne on a tall stem; starry perianth of cream-white, with a trumpet of a pale primrose; beautiful for cutting and effective in front of the Daffodil border, among other varieties.

Triandrus Hybrid Narcissus, Agnes Harvey

Barri Narcissus, Red Shadow

Leedsi Narcissus, Lord Kitchener

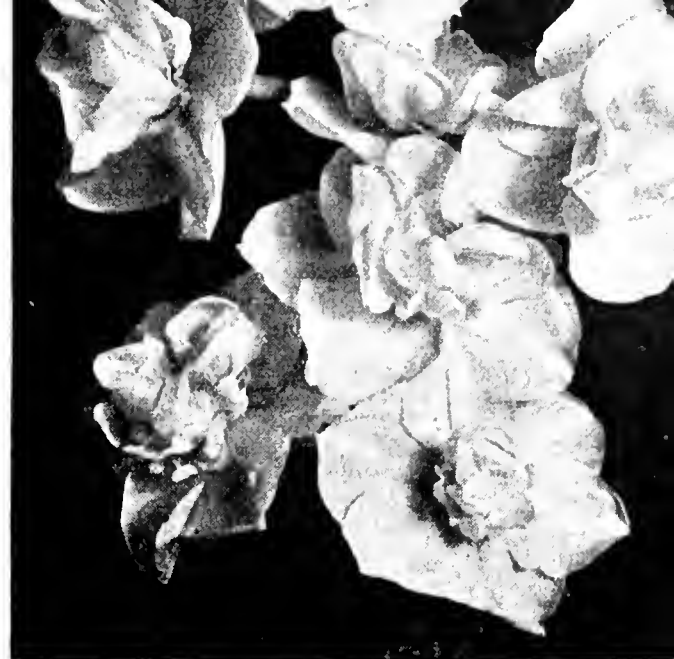

Janquilla Simplex Narcissus

Poetaz Narcissus, Klondyke

Poetaz Narcissus, Cheerfulness

Poetaz Narcissus

Particularly Recommended in This Class is Frans Hals

Division 8: All Poetaz are hybrids from Poeticus Ornatus and Polyanthus Narcissi. The plants are tall and vigorous growers, bearing heads of large, well-formed flowers, deliciously fragrant. There is no better group for indoor culture in flats, pots or bowls, while if planted in time, their hardiness outdoors leaves nothing to be desired.

Admiration

Doz. \$2.05, 100 \$13.00

This beautiful cluster-flowered Daffodil is especially lovely in full sunlight, as it has a transparent character, but the flowers viewed in shade do not look poor or papery. The perianth, which is a sulphur-yellow, seems rather to be of the quality of the soft taffeta silk which, in the old days, was known as "sarsenet," and the petals are slightly ridged lengthwise. The corona is of rich orange-scarlet and there are usually about 6 flowers to a stalk.

Cheerfulness

Doz. \$1.20, 100 \$7.75

The double Elvira, a very pleasing double white Poetaz, good stems, a fine garden and show flower.

Elvira

Doz. \$1.00, 100 \$6.50

Three to four large flowers of great substance, borne on long, graceful stem; broad white petals and a golden yellow cup, edged orange; delicately fragrant. Makes a splendid combination in the garden when planted among the earliest Darwin Tulips or massed on a bank with Tulipa Clusiana.

Frans Hals

Doz. \$1.00, 100 \$6.50

Creamy white perianth of perfect form, yellow cup, which sparkles in the sunlight, exceedingly free flowering.

Glorious

Each \$0.45, Doz. \$4.50, 100 \$33.25

Tall, flower delightfully informal in habit, perianth Poeticus white with eye orange, edged red; good for semi-shade; very early and an excellent forcer.

Klondyke

Doz. \$1.45, 100 \$9.50

One of the finest of the yellow Poetaz. Perianth is of rich yellow with a slightly darker cup.

*Laurens Koster

Doz. \$1.40, 100 \$9.00

Creamy white perianth, lemon-yellow cup, free flowering. (Color illustration, page C.)

Scarlet Gem

Each \$0.35, Doz. \$3.00, 100 \$20.75

Here is a very artistic contrast in color. The attractive, finely formed flower has a perianth of primrose-yellow with a deep orange cup. A most interesting Poetaz.

Orange Cup

Doz. \$1.60, 100 \$10.50

Creamy white, conspicuous orange cup, a most delightful color combination of plastic rubies floating on sulphur pools, 6 to 8 florets and usually two stems per bulb. Keeps its color in bright sunlight positions.

Double Narcissus

Particularly Recommended in This Class is Holland's Glory

Division 10:

*Albus Plenus Odoratus

Doz. \$1.05, 100 \$7.00

The old Gardenia-flowered Double Poet's Narcissus. Pure snowy white; wonderfully fragrant. Should be planted in the shade and kept well watered at flowering time to prevent the flower buds from drying off. Blooms extremely late, long after most of the Narcissi have gone. It is a rare old variety preserved jealously in a few old gardens and worth special care.

Daphne

Doz. \$2.30, 100 \$14.50

The most promising novelty of this division. Pure white, sweet scented, large double flowers; early forcer.

Doubloon

Doz. \$1.20, 100 \$8.00

Longer petals of primrose, interspersed with shorter petals of canary-yellow, giving a golden glow to the entire flower.

Holland's Glory

Doz. \$1.75, 100 \$11.25

A very double, medium long, three-cornered cup is placed on a double row of petals. The color is clear lemon throughout. One of the finest double Daffodils.

Indian Chief

Doz. \$2.05, 100 \$13.00

Very large and very double, bright yellow interspersed with orange; the petals curled and twisted. A large substantial almost globelike ball of yellow and orange.

Irene Copeland

Cyclamineus Hybrids

Little Daffodils Wild Species

Particularly Recommended in This Class is Bulbocodium Conspicuum

The following are charming little subjects for rock work, where their dainty flowers are seen to perfection. They should be left undisturbed for years, and if happy, will soon establish themselves and afford a lovely picture in early spring. All the Bulbocodium (except Monophyllum) and the Cyclamineus like moisture, and should, therefore, be planted at the foot of the rockery. Bulbocodium monophyllum flourishes in a warm, dry sheltered situation planted in almost pure sand. Triandrus Albus (Angel's Tears) and Juncifolius delight in partial shade and a light, gritty soil, and should be given a well-drained position.

Named Daffodils for Naturalizing in Drifts

Some people prefer to naturalize Daffodils in drifts; planting a certain number of bulbs of one variety in a clump as shown in the colored illustration on the opposite page. Here we see in the immediate foreground Emperor followed by Helios which in turn is followed by Barri Conspicuus, next to which is planted Poeticus Recurvus which is still in bud, and so on. We offer here 10 kinds particularly suited for such treatment.

Mixed Daffodils for Naturalizing

The greatest and most effective use of Daffodils is to naturalize them in quantity in meadows and orchards in woodlands and along the driveway, on the bank of the brook or along shrubbery.

By planting some bulbs on the south side and some others facing north, a long period of flowering, lasting well over a month, may be enjoyed.

Daffodils are the most prolific of flowers. If you plant a single bulb it will not be long in gathering a family, and in the course of two or three years the spot in which it grows will have become as populous as the tents of the patriarchs.

Planting mixed Daffodils is an investment that pays large dividends, **if the right varieties are used.**

The mixture presented by us is made up from named varieties and should, therefore, not be confused with other mixtures offered. This mixture is not grown as such, but varieties are selected that are especially adapted for naturalizing and will give an abundant and prolonged flowering period, increasing rapidly.

*Mixed Daffodils, Standard and New Varieties

Containing standard varieties as well as novelties. In the making of this mixture a very considerable number of newer kinds were included. More than forty varieties all told were used to make this fine mixture.

Doz. \$1.20, 100 \$8.00, 1000 \$75.00

*Mixed Daffodils, Standard Varieties

This mixture is carefully chosen, contains twenty or more varieties which bloom freely without the need of constant transplanting.

Doz. \$0.90, 100 \$6.00, 1000 \$55.00

Anemone

These popular flowers of French origin are exceedingly brilliant when in flower and excellent for cutting. They like to be planted about 6 inches deep in a cool, moist but well-drained soil. Will establish without any trouble and remain for years. For northern states we advocate early spring planting, for the southern section of the country, fall planting is best. Cover in winter with straw manure.

***St. Brigid** Doz. \$0.90, 100 \$6.25

These are the popular Anemone so frequently seen in the florists' shops in the early spring. The flowers are unusually large, with a wide range of rich and brilliant colors. (Color illustration, page F.)

***De Caen** Doz. \$0.80, 100 \$5.00

Terrestrial Orchid from China and Japan. Easily grown in ordinary garden soil with plenty of moisture. Prefers half shade. Blooms in spring. Hardy under all conditions. Delivery late fall.

Hyacinthina Each \$0.90, Doz. \$9.00

Bright green plaited leaves 1 to 2 inches wide, 12 to 15 inches high. Three to five dainty orchid-shaped flowers on stems 10 to 15 inches tall. Cuts well.

Similar to Hyacinthina except slightly smaller. Has bright clear white flowers.

Brodiaea

(Hardy—Give Light Protection)

Small bulbs producing grassy leaves near the ground, and very slender but stiff naked stems bearing a head of waxy flowers of great lasting quality. Their culture is the same as for Narcissus and just as easy as for that flower. They are easily naturalized in almost any soil. Plant them about three inches deep and leave them alone. They are especially happy under oak and deciduous trees, in the rock garden, or in rough, gritty soils.

***Mixed Varieties** Doz. \$0.80, 100 \$5.00

This mixture contains the following colors: blue, red, yellow, white, and is good for naturalizing. Bulbs self-sow and increase quite rapidly.

Calla - Zantedeschia

Bulbs should be set with the crown, or top, protruding just above the surface. When in growing condition, warm water given several times during the week will hasten the flowering period and increase the number of blooms. Plant but one in a pot. We call especial attention to the Yellow Calla, which is one of the grandest varieties in cultivation, and most valuable for house or conservatory decoration. Plant Callos indoors in the late fall of the year. In April or May dormant bulbs may be planted near the pool in a sunny spot where they will flower beautifully in August or September.

Alba Maculata Doz. \$2.25, 100 \$15.00

The abundant spear-shaped leaves are spotted silvery white all over, reaching a height of 18 inches, and are produced abundantly. The white flowers are small and trumpet-shaped with crimson blotch at the base. Excellent near pool or in a bog garden. Plant outdoors in spring.

Doz. \$2.50, 100 \$17.25

Bloom of Hybrid Amaryllis

Calochortus

Until one has seen a good collection of these plants, he has no idea how much Nature can do in the variation of one flower. All Mariposas are forms of Calochortus, yet there are several strains, all with the slender grace of stem belonging to the species. Cup-shaped flowers, one to many on a stem, wonderfully marked with eyes and dots and pencilings in rich colors, are characteristics. Yet each strain carries out the plan on a color scheme of its own, and then can be compared only with the Orchids in wonderful variability of beauty. "Mariposa" is simply the Spanish word for butterfly, and is applied to these Tulips because the eyes and markings are so much like those on a butterfly's wings. The bulbs are small and should be planted about 2 1/2 inches deep and covered during winter.

***Clavatus** Doz. \$1.85, 100 \$12.00

The largest flowered and the stoutest stemmed of all Mariposa Tulips. The blooms, which are shaped like a bowl, are often over 4 inches across, of a deep yellow, and the lower half covered by stiff yellow hairs.

***Venustus, El Dorado** Doz. \$0.90, 100 \$6.25

They grow from 1 to 2 feet high and branch. The flowers are simply marvelous in their variety of colors and markings. Scarcely two are alike; in a mixed lot they may vary through white, lilac to purple and again through shades of pink to claret-red. In any mixture whites, more or less eyed, predominate. There is no better investment for the flower lover than a quantity of these bulbs. They thrive best in a rather porous soil, either sandy or gritty, and will grow either in sun or light shade. Flowers are 2 to 4 inches in diameter. Mixed colors.

***Venustus oculatus** Doz. \$0.90, 100 \$6.25

Wonderfully varied in whites and cream. More or less tinted purple, and with very rich eyes. We have had the flowers 4 inches across. The plant is a good grower, and the flowers are most satisfactory.

***Finest Mixed Colors** Doz. \$0.80, 100 \$5.00

This is a lovely mixture containing many varieties; planted in a sheltered spot in the rockery they will make a charming lot of color.

Eremurus Robustus

Chionodoxa Gigantea

Chionodoxa Tmoli
Allium Neapolitanum

Camassia

(Hardy)

There are few bulbous plants that meet climatic or soil conditions better or give a more attractive bloom. They are hardy without protection, and thrive either under ordinary garden conditions or when naturalized in open, moist woods or in not too dense a grassy growth. The flower stems are 3 to 4 feet high with as many as a hundred star-shaped flowers measuring 1½ inches across and flowering in long succession.

***Esculenta** Doz. \$0.70, 100 \$4.25, 1000 \$37.50

Very showy in mass planting. Forms flower spikes 2 feet high, bearing a cluster of star-shaped flowers of a very fine, rich purple. Plant 4 inches deep. Extra heavy bulbs.

***Leichtlini** Doz. \$1.05, 100 \$7.25

Same as preceding but stronger grower, flowers are larger and come in various hues of blue and creamy white. Extra heavy bulbs. (Color illustration, page F.)

Chionodoxa - Glory-of-the-Snow

A mass planting forms one of the most sumptuous displays of floral beauty, a mass of blue and white, intense and brilliant. They bloom at the time of the Crocuses, producing dwarf flower spikes, bearing from 12 to 15 flowers of a sky-blue with a pure white heart, creating a lovely effect. They should be planted in the fall, 3 inches deep, about 18 bulbs to a square foot, in a sunny location or in half shade and in places where they can remain undisturbed for a number of years. The flowers will cross with one another and will seed themselves, forming natural colonies. All are 6 to 7 inches high, therefore excellent in the rockery as well.

STANDARD VARIETIES

***Luciliae** Doz. \$0.45, 100 \$2.75, 1000 \$25.00

Top size bulbs. Bright blue, white center. Flowers often with 6 to 8 blooms on each stem. (Color illustration, page E.)

Eremurus

A noble family of hardy plants, most delightful and desirable for stately and colorful groups in large plant borders and shrubberies. They are perfectly hardy, and when well established, produce dozens of giant flower spikes, like huge Hyacinths, attaining a height of from 6 to 10 feet, the flower spike (comprising several hundred flowers) being from 2 to 3 feet long. They thrive in any sunny, well-drained border. They should be planted in early fall only. These wonderful, gigantic flowering plants do not require a great depth of soil, as the fleshy roots spread outwards. The plant disappears above ground after flowering and annuals may be planted close to them to fill the vacant space. A light mulching is advised as a winter protection.

The following list includes some of the finest and rarest in commerce, all flowering in July. No. 1 and No. 2 size roots not guaranteed to bloom first year.

***Bungei** Each \$1.00
Vigorous, enormous spikes of widely expanded flowers of clear yellow. Six feet high.

***Elwesianus** Each \$2.00

Grand, tall hardy hybrids, the inflorescence 3 feet long, studded with myriads of coppery pink, orange, pale yellow, and pink flowers, shot with delicate bronze. Rare and richly colored. They grow to an average height of 7 feet. For garden planting as well as for cutting we believe these hybrids to be the best. They make a stunning show in the garden as well as indoors. For several years we have been increasing our stock so we could offer roots at a popular price. We suggest that they be planted in groups of not less than 3, better effects are created if planted in masses of six or a dozen. We have made our price low to enable you to do this. All plants we send out are flowering size. (Color illustration, page E.)

Eremurus

Three-Year-Old Seedlings

During the past few years there have been many requests for Eremurus seed and young plants. The seed of Eremurus is difficult to germinate; we, therefore, never offered it because it was bound to lead to disappointment. Seedling roots, one or two years old, are too small for the average person to care for, but we are now able to offer some fine roots which are three years old. We know these will grow without trouble and surely are the same varieties as offered above. It will be well worth your while to plant a few of these healthy young roots for growing on.

*Eremurus Seedlings

Eranthis - Winter Aconite

Plant Bulbs Immediately Upon Receipt

These produce about two weeks before the Crocus are in bloom, little yellow flowers like Buttercups about 3 inches above the ground, with settings of fine green, frilled collars which never seem to mind the worst of weather conditions. Will thrive under trees where few other plants can hold their own. They seed themselves freely and colonies from self-sown seed are soon formed. Plant at once upon receipt, firmly, 2 inches deep in shade or full sun, about 18 bulbs to a square foot.

Cilicica

Doz. \$0.65, 100 \$3.75

Deep yellow flower, foliage bronzy and finely cut; lovely rock garden variety.

*Hyemalis

Doz. \$0.60, 100 \$3.50, 1000 \$30.00

The common Winter Aconite, clear yellow, very early. Good for the rock garden, under Sedums or under trees. Plant bulbs at once when received. (Color illustration, page H.)

Freesias

Without doubt the most sweetly scented flower grown; a single bloom permeates the living-room with its delicate perfume. Although they are quite popular and very easily raised, we suggest the following treatment: Procure the bulbs as early as possible and plant them in August, 6 to 25 bulbs for a single pan. The soil should be a mixture of good loam. The bulbs planted early, say August and September, must be placed outdoors until cold weather sets in; must be regularly watered and kept growing all the time. In November, before frosts appear, the pots should be placed in the window of a cool room.

*Elder's Giant White

Erythronium, Hartwegi

Galanthus Byzantinus

Galanthus - Snowdrops

Snowdrops belong to the most beloved early flowering spring bulbs. They require very little attention, and can remain undisturbed for years and years. They like rather moist and cool soil. To get a lovely effect they must be planted thickly, while they can be grown under trees and shrubs, in woodlands and in lawns. In the latter case, the lawn should not be mown before the leaves are withered, or next year's blooms may be spoiled.

***Nivalis** Doz. \$0.60, 100 \$3.50, 1000 \$30.00

This is the old-fashioned favorite. Its lovely white nodding blooms are out before the frost is out of the ground; one of the lovely bulbs that tell us spring is almost here. A group naturalized in the shade of shrubs or under trees is worth while. Once planted they remain for a lifetime. (Color illustration, page H.)

***Nivalis flore pleno** Doz. \$0.70, 100 \$4.00, 1000 \$37.50
Double form of the common Snowdrop, requiring same care.

***Elwesi** Doz. \$0.60, 100 \$3.50, 1000 \$30.00

This is a larger type than the old-fashioned Galanthus Nivalis and comes from Southern Europe. It is a very fine kind for the warm parts of the United States where the common Snowdrop does not do so well.

Byzantinus Doz. \$1.10, 100 \$7.50

The Byzantine Giant Snowdrop; broad shiny leaves like Galanthus Plicatus and large snow-white globular flowers. Very early flowers; in mild winters we often have flowers here in January. It requires a somewhat sheltered position. May be gently forced in pots.

Fritillaria Imperialis

(Crown Imperials)

The Crown Imperials with their stately gracefully drooping flowers should not be missed in any garden. They want a good soil, much sun, and can be left undisturbed for years. Must be planted as early as possible and have to be carefully protected against sharp winds, as the tall plants grow 4 feet and more high. They are real "grandmother's favorites" and should be in every hardy border or old-fashioned flower garden. (Color illustration, page E.)

***Aurora** Doz. \$3.75, 100 \$25.00

Red-orange. This is the common Kaiser Crown. Height 30 inches.

Foliis argenteis vittatis Each \$0.50, Doz. \$5.00

Orange-brown, heads with large flowers, very fine, strong and robust growing variety which we can recommend as one of the best. Height 36 inches.

Fritillaria - Mission Bells

The true Mission Bells do better in a clay soil in full sun. The woodland Fritillarias like woodland soils and conditions, and in cultivation some shade and a free soil. They are hardy as far north as Wisconsin.

***Lanceolata** Doz. \$0.90, 100 \$6.25

Grows from 1½ to 3 feet high. The flowers are green and brown mottled prettily, produced on top of the stem, a most attractive variety.

***Recurva** Doz. \$1.30, 100 \$8.75

Is as beautiful, and much resembles a Lily. In size and habit like Lanceolata with orange-scarlet flowers of a lovely clear brilliant coloring.

***Pudica** Doz. \$1.45, 100 \$9.75

Of still a different habit. A low plant about 6 inches high with a single clear bright yellow bell. Likes sandy or loose soils and a warm spot in the rockery where you will enjoy it immensely.

***Mixed Varieties** Doz. \$1.05, 100 \$7.25

This mixture is made up of Mission Bells and varieties of Meleagris, and would be very interesting in the rockery.

Fritillaria - Guinea Hen Flower

Fritillarias are lovely bulbous plants for rock garden or indoor culture. The stems are leafy and most graceful, with many pendent, bell-like flowers. One species found in Southern California is called "Mission Bells," while in other places local species are called Brown or Chocolate Lilies.

***Meleagris** Doz. \$0.65, 100 \$3.75, 1000 \$35.00

Bronze-purple. These produce in early April dwarf, pendent, reddish brown and purple bell-shaped flowers in curiously checkered shades, on stems 12 inches high. They are very effective in colonies, requiring a somewhat dry situation. Invaluable for the rockery, for naturalizing and very lovely grown in pans indoors; use same culture as for Freesia. (Color illustration, page E.)

***Meleagris alba** Doz. \$0.75, 100 \$4.50, 1000 \$40.00

This is the pure white form of this interesting type described above. Twelve inches high.

A very fine strong growing variety with large white flowers quite a little better than the common alba. 14 inches high.

Meleagris, Artemis Doz. \$1.15, 100 \$7.75

Flowers grayish purplish checkered, very fine variety. 14 inches high.

*Reticulata (Fragrant Iris)

Doz. \$1.60, 100 \$11.25

This lovely species is one of the treasures of the garden or rock garden. It can be described as a small form of the Spanish or Dutch Iris. Its main value lies in the fact that it may be forced into bloom in the house with the greatest ease. Six or eight bulbs put into a 4- to 5-inch pot when received will bloom about Christmas time. The fragrant blossoms remind one of a bunch of fresh violets. Perfectly hardy with reasonable protection. It is one of the loveliest early flowering bulbs for the rockery. To show it off well, plant a number of bulbs under the white Arabis Alpina; you'll enjoy the results more than we can tell you. (Color illustration, page G.)

The varieties contained in our mixture, we have especially selected as being the very finest and most distinct in cultivation, and they will be found as strikingly beautiful in color as many of the sumptuous orchids. They flower from end of June to beginning of July, thus succeeding the Bearded Flag Irises, Early Xiphium and Spanish Irises. As cut flowers they take a first place.

Improved Spanish Iris—For Garden Planting

This very distinctive group is of recent origin and has in a few years won international recognition. The flowers are not only superior in substance, brilliancy and purity of color but also earlier, larger and of greater refinement than the old Spanish Iris. The new hybrids we offer are readily distinguished by the narrow orange stripe on the falls, while the older varieties have a larger yellow blotch. These Iris are unsurpassed as cut flowers, since they will stand any amount of handling, lasting fully a week in water. Their hardiness and interesting color range have made them very popular for garden planting. In extreme climates they need some protection. The varieties we list have been carefully selected to give the full range of colors. (Color illustration, page G.)

Recently introduced hybrid from South Africa, quite different from other Ixias. Blooms in late spring. Wiry stems 4 to 5 feet tall with 20 to 40 open flowers in a raceme at the top with several smaller flowering branches below. Color varies from pure white through shades of pink overlaid with a bluish tinge. Excellent for cutting.
- ***Mixed** Doz. \$0.45, 100 \$2.75
These beautiful bulbs from the Cape Colony (South Africa) are far too little known; they should be planted in late autumn and in cold districts they must be covered with a thick layer of straw or leaves. They are splendid for southern states. There are few bulbs so lovely and graceful and those fortunate enough to live where the climate is mild should plant them by the hundreds.

Lachenalia

This Cape bulb has been terribly neglected in this country. They are long known in Europe under the name of Cape Cowslip. These bulbs are especially useful for forcing as they can be grown in flats or in pots or baskets. All of them do well out-of-doors in milder climates and are showy in beds, borders, and rock gardens and all are easily grown under glass. They have from one to two dozen generally, pendulous, fire-cracker-like flowers, three-quarters to one inch in length on stems six to nine inches and bloom from late November to February, depending on the time of planting and the temperature in which they are grown. The flowers are loosely borne in a tapering spike eight to twelve inches high, but do not droop. Stamens and style in some varieties extend beyond the mouth of the flower.

Cultural Directions: The bulbs may be planted five or six in a 5-inch pot in a compost of two parts sandy loam and one part leaf mold. Water sparingly. Place in cold frame until weather becomes too cold, then move to a greenhouse or bring in house. Water may be used frequently in growing stage. May be had in bloom at Christmas. Bulbs multiply freely and may be used from year to year.

- Pendula superba** Doz. \$2.30, 100 \$15.25
Flowers brilliant coral-red tipped green and purple. Two or three Tulip-like green leaves. One of the best and earliest. Excellent for indoor growing. Easily in bloom by Christmas.

- Tubiflora** Doz. \$2.15, 100 \$13.75
Flowers creamy white, bluish at the base tipped with purple standing nearly upright on a 6- to 12-inch spike. Stem green mottled with purple. One green leaf.

Lycoris

- Radiata** Doz. \$2.15, 100 \$13.75
Native of Japan and China. Blooms in fall before leaves appear. Bright red funnel-shaped flowers with wavy segments, somewhat like nerines, on stems 12 to 18 inches tall. Free blooming and easily grown. May be left undisturbed for several years in milder climates when it will make fine showy clumps.
- ***Squamigera (Amaryllis Halli)** Each \$0.75
Produces in early spring attractive green foliage which grows until July when it ripens and disappears. About a month later, as if by magic, the flower stalks spring from the ground to a height of 2 to 3 feet, developing an umbel of large, Lily-shaped flowers, 8 to 12 in number, of a delicate lilac-pink shade. The bulb is perfectly hardy; must be planted in fall. Cover crown about 4 inches.

This is one of the earliest and most attractive spring flowers. Growing from 6 to 8 inches high they bear dainty nodding flowers which are white, tipped with green. Plant in early fall in a good, light, well-drained soil 4 or 5 inches apart in masses of bold clumps, 2 inches deep. If left alone will bloom year after year.

Moraea

An interesting group most of which are natives of South Africa, many being new to cultivation. Some are useful for cutting, others for the perennial garden and others still for pot culture and rock gardens. All listed below flower in spring. They show a wide range of colors and vary in height from 6 inches to 3 feet. On most of them the foliage is not important, same culture as for *Freesias*.

- Glaucopis (Iris Pavonia)** Doz. \$2.30, 100 \$15.25
Often called Peacock Iris. Flowers white or light blue with peacock eye at base of outer segments. Stems 10 to 15 inches high. Excellent for cutting, forcing, rock gardens and pots.

- Polystachya** Doz. \$1.60, 100 \$11.25
New introduction. Slender plant 18 to 24 inches high with many wiry branches. Well covered with flowers looking at a distance like a close group of butterflies. The outer segments of the flowers are light mauve, penciled with Parma violet, with a bright yellow spot at the base, inner segments light mauve with little penciling. Starts flowering 6 weeks after planting and keeps on 3 to 4 months. Blooms can be had throughout the year in the milder climates by making successive plantings about every 2 months. Very useful in the colder climates as a window pot plant in the winter and out-of-doors in the spring and summer as soon as danger of heavy frosts is over. Planted in clumps it provides a mass of color over a long period and should be very useful in the border especially as a supplementary plant in Iris gardens. Corms can be held in cold storage at 40 degrees to make successive plantings over a long period.

- Isopetala** Doz. \$1.60, 100 \$11.25

The plant grows from 1 to 2 feet high, bearing a panicle of flowers about 1 inch long in short pendent clusters. It is splendid on the open border or for naturalizing along the woodland path. We know of no other spring flower which does so well in deepest shade. It flowers from the time Daffodils are in bloom, continuing while the May-flowering Tulips are at their best. Use this delightful plant in quantities, as it is permanent and so helpful to create beautiful pictures, especially in shady places. (Color illustration, page G.)

- ***Flowering Roots for immediate effect for naturalizing**

100 \$10.00, 1000 \$95.00, 25 plants at 100 rate

We guarantee this root to bloom 100 per cent.

They are bright crimson in color, about 1½ inches across; the sickle-shaped segments being scarcely crisped; filaments are bright red. The leaves appear after the flowers. They are easily grown indoors, in the North, but in the South may be grown outdoors in ordinary good garden soil.

Veltheimia Viridifolia (See page 19)

Muscari - Grape Hyacinths

Muscari are charming spring-flowering subjects. They can grow under trees and shrubs and also do well in full sun in the border or at a sunny spot of the rockery, without any special attention. They are best planted immediately on receipt and can remain undisturbed for years. They are absolutely hardy and some varieties are delicately fragrant. Botryoides, Azureum and Armeniacum are beautiful when forced in the house, same culture as Freesias; while Plumosum is always a source of great interest. All are about five inches high.

Puschkinia

- Libanotica** Doz. \$0.70, 100 \$4.00
A beautiful little April-flowering bulb prized for the permanent hardy flower border and rock garden; it is also an easily grown indoor pot plant. The flowers are white, shaded and striped a soft clear blue, about 6 inches high.

Sparaxis

- ***Finest Mixed** Doz. \$0.80, 100 \$5.00
Delightful spring-blooming Cape bulbs of the Ixia group, their beautiful flowers being borne on graceful spikes about 6 to 8 inches high and the colors of the brightest and all shades. They are tigered, blotched, spotted, streaked and flushed, a complete riot of color. They are also excellent for conservatory and indoor treatment. For the southern rock garden they are indispensable. Protect in cold climates.

Sternbergia

- Lutea major** Doz. \$1.85, 100 \$12.00
A very effective autumn-flowering bulbous plant producing Crocus-like flowers of a rich golden yellow. The bulbs make a charming decoration if planted in bowls or pots and flower a few weeks after planting. Out-of-doors the Sternbergia likes a warm, well-drained situation on banks or borders, where it should be left undisturbed. The bulbs should be planted 9 inches deep, and in cold districts a covering of dry litter should be given in winter. Fine for the rock garden.

Triteleia - Milla

- ***Uniflora violacea** Doz. \$0.70, 100 \$4.25
A rootlike bulb which produces in early spring a pale violet-blue flower with white center. Somewhat resembles the Chionodoxa, is delightfully fragrant. They spread and multiply with amazing rapidity and are excellent in the rockery or under shrubs or trees where nothing else will grow. They are hardy, but like a little protection. About 3 inches high. (Color illustration, page R.)

Muscari Plumosum

Scilla - Squill

The rich dark blue of *Scilla bifolia* and the bright blue of *Scilla sibirica* in early spring render them invaluable for edgings or for massing in flower beds and borders. As they bloom so early in the year, it is advisable to give them a sunny location. They are not particular about the soil in which they grow. They are ideal for the wild garden but they are not to be despised in the border, especially if they are left alone for 2 or 3 years without being disturbed in any way. They are splendid in the rock garden. Never plant less than 12 to 18 bulbs in a clump.

***Bifolia** Doz. \$0.45, 100 \$2.75, 1000 \$25.00
This species flowers in March with deep gentian-blue flowers. They are very beautiful in combination with the early flowering *Eranthis*, *Snowdrops*, etc.

Earliest to flower, connecting the flowering of the *Crocuses* with the *Narcissi*. Fine for naturalizing, producing drooping, bell-like flowers on stems 3 to 4 inches high. Succeeds well in the rock garden. Color bright blue. Plant 3 inches deep in shade, half shade or full sun. Giant bulbs are offered above. (Color illustration, page E.)

Sibirica, Spring Beauty Doz. \$1.55, 100 \$10.25
A distinct improvement over the type. The flowers are more numerous, of a wonderfully brilliant rich blue, and grow twice as tall. Highly recommended.

Critonia

***Crocata** Doz. \$0.75, 100 \$4.50
This interesting bulbous plant is commonly known as the *Orange Ixia*, which it resembles. It is very floriferous; forces easily and produces lovely orange flowers. Give it the same treatment as *Freesia* and you will enjoy it very much. Height about 10 inches. Lovely in the rockery in southern gardens.

Vallota

***Purpurea** Each \$1.00, Doz. \$10.00
The *Scabroborough Lily*, a South African native and one of the most attractive of the *Amaryllis* family, growing sturdily and increasing rapidly. Scilla Hispanica, Blue Queen

Scilla Campanulata

(Wood Hyacinths)

The English Blue Bells (*Scilla nutans*) with its long varieties (*S. hispanica*) has erect flower spikes and open campanulate flowers. All are very effective in flower and shrubbery borders, and most valuable for wild gardens and woodlands, where they should be largely naturalized. Wood Hyacinths may be planted in bare shady places and odd corners which often have a desert-like appearance which can thus be rendered bright and cheerful. They will also thrive under Fir and Pine trees, where few other plants will grow.

Popular Ideal Darwin Tulip Collection

Ten Proven Varieties

The Late Leonard Barran Said This About the Ideal Darwins:

It is rather hard for me to control my wild enthusiasm for the Ideal Tulips. I think they are just the finest things that can be put into the garden. The flowers are large, have all the character, dignity, and sturdiness of the Darwins; in fact, they look like Darwins except (and here is the great point) that the colors are clear and gay. That is really the great charm of the Ideals. I had almost come to the conclusion that Tulips did not really reflect the spirit of spring in the garden but the Ideals have changed that thought. My garden this season was just dancing with gayety. I have an underlying feeling that is growing very strongly in my mind that the spring garden should have a light and ethereal quality. You know, Wordsworth wrote about one's soul "dancing with the Daffodils," and I think he just caught the exact emotional feeling that we get from the Daffodils in the garden. That is why people like Daffodils. The Tulips have lacked that gayety, hitherto.

A Hint to Our Customers

A substantial part of the phenomenal crop of Tulip bulbs harvested in Holland last summer (1938) was replanted in the autumn of that year. The result is a very considerable reduction in prices, particularly noticeable among the better varieties.

These low prices will not prevail for long. We, therefore, urge you to make this a Tulip-buying year.

Do over your old plantings, stock up and take advantage of an opportunity which rarely presents itself.

The New Ideal Darwin Tulips

What Nationally Known Authorities Say

Richardson Wright (House & Garden) writes:

For several years now the "Ideal Darwin" Tulips have made a most gallant and brilliant display in my garden. They possess sturdy substance that leaves nothing to be desired. Their color range is so generous that both in massed plantings and in shoals through the herbaceous border all manner of subtle and striking combinations can be made. They are a garden investment that pays high premiums of beauty.

Leonard Barron (Flower Grower) writes:

Further study of and experiment with the Ideal Darwin Tulips merely adds weight to the conviction already expressed; that they do form a really ideal group in that splendid family of bulbs. Their bright colors, their cheerful bearing and, yes, their real gayety in the garden, make them delightfully welcome.

The Ideal Darwins have, indeed, made my garden much more joyous in Tulip time.

IDEAL DARWIN TULIP MIXTURE

This mixture contains a marvelous selection of new Ideal Darwins. It stands to reason that it is impossible to introduce all the new creations that are being produced by the originator. Therefore, many magnificent seedlings must be destroyed in order not to bring out too great a selection of varieties, many of which are often much alike. It is those unnamed but truly choice seedlings, as well as many of the named varieties that compose the selections we are offering here.

are alive and sparkle, yet with a restraint that bespeaks fine breeding. The flowers last long, standing up well in great heat; unquestionably the best variety in this collection. We have requested the production of a large quantity so that at time of introduction it could be offered at a moderate price. Can be had from Wayside Gardens only. (Color illustration, page N.)

Perhaps the most artistic of all Breeder Tulips; a flower of enormous size carried on a very tall stiff stem. Of glorious coloring and in every way desirable for every purpose. The beautiful intriguing color is of an Indian-brown, flushed coppery brown; a very effective dark, wood-brown Tulip with a burnished metallic sheen and illusive rose-colored lights. One of the handsomest of the brown Breeders, standing on a stem 38 inches high. (Color illustration, page K.)
- *Louis XIV, 2** *Doz. \$0.80, 100 \$5.75*
A large, goblet-shaped flower, which possesses a most artistic blending of tones, deliciously scented. Dark bluish violet with tawny margin flushed golden brown and dull blue base with a yellow star, shaded bronze. A mass planting gives a comforting feeling of rest. Plant these giants above masses of Forget-me-nots or yellow Pansies; a beautiful effect can be obtained. Blends well with Bacchus, Goldfinch and Darwin Tulip Duchess of Hohenberg. - William the Silent** *Doz. \$2.25, 100 \$15.00*
What a marvel is this among the purple Breeder Tulips! Its widely opened cup of warm, reddish purple, its generally superb appearance, the fine texture of its petals, make it an outstanding purple Tulip, and one deserving its illustrious name. The flower is carried on a strong, tall stem. With its striking creamy base outlined with blue, and its purple-velvet anthers, it is a variety to adorn the stateliest garden. Height 30 inches.

- *Choice Mixed Breeder Tulips** *Doz. \$0.70, 100 \$4.75*
Mixed bulbs, as a rule, do not appeal to the planter because of the difficulty in the blending of colors. Breeder Tulips, however, are in a class by themselves, and their colors do permit easy blending. They are in shades of bronze, golden bronze, violet, buff, maroon and terra cotta. We suggest a liberal planting for cut flowers.

Cottage and Hybrid Tulips

(May-Flowering Tulips)

The Cottage Tulips come into bloom in early May. They are hardy and robust, with long, slender, but very stiff stems. The flowers are mostly long and oval, many of them with the petals gracefully reflexed. The Cottage Tulips as a class are rich in the more delicate

and artistic shades of pink, yellow, orange, and fawn with salmon, old rose, and amber. They are best of all Tulips for cutting and should be planted outdoors. They will last for many years.

Adriani *Doz. \$1.10, 100 \$8.00*
Clear primrose-yellow; inside canary-yellow; yellow base and stamens. One of the loveliest Tulips. 24 inches.

Advance *Doz. \$1.90, 100 \$12.50*
A gorgeous new Hybrid introducing into the Cottage strain the blood of Tulipa Greigi, the fieriest red of the Botanicals. It produces giant, blazing red flowers on 24-inch stems.

***Alaska** *Doz. \$0.70, 100 \$5.00*
Clear bright yellow and elegant form. The petals reflex slightly and the charm of the slender bloom is unusual. 25 inches.

***Ambrosia** *Doz. \$0.75, 100 \$5.25*
A rich flower of pale terra cotta and amber, and a rosy glow throughout, of great size and slender form, held on a very long stem. For cutting or garden use it is superb. The fragrance is equal to that of the well known Rose Columbia. 28 inches.

***Arethusa** *Doz. \$0.80, 100 \$6.00*
A charming two-tone Tulip. Large and freely opened cup with broad petals slightly reflexing, of unusual grace and beauty. The artistically formed flower is of a translucent, light chrome yellow. There is, we believe, no color just like it, contrasting perfectly with the green of its leaf, adding to its other charms an exquisite springlike fragrance. Massed over brown Pansies or rising out of drifts of Forget-me-nots, they create an unforgettable picture. Fine for cutting. A most important acquisition. Height 25 inches.

***Avis Kennicott** *Doz. \$0.70, 100 \$5.00*
Very large, chrome-yellow flower, with striking black base and anthers. Sometimes appears without this black base. Effective grown among blue Myosotis or Mertensia Virginica, or have them rise in quantity from a solid bed of double arabis, the long flower held up straight on a strong stem. For effect large masses of this variety should be planted. 27 inches.

***Barbara Pratt** *Doz. \$1.40, 100 \$10.00*
One of the most remarkably beautiful and brilliant Tulips of recent introduction. The color is a most radiant cherry-pink with an extraordinary effect of golden light shining through it. The flower is long and exquisitely modeled and gives forth a delicious fragrance. It does not fade in the sun and lasts in perfection for a much longer period than most Tulips. Undoubtedly destined for a great future. Height 36 inches.

***Buff Beauty** *Doz. \$0.80, 100 \$5.75*
This interesting and beautiful Tulip has the true cupped form of the Darwins with strong erect stem of medium length, but the color of the flower is in the best tradition of the Cottage type, a rich glowing blend of coral-rose and dark amber with a canary base and buff anthers. The color is delicate with lovely flushes, that one has difficulty giving a description of its charms. It is sweetly fragrant. Height 25 inches.

***Carrara** *Doz. \$0.85, 100 \$6.50*
This Tulip has created, by its beauty, a sensation at the great flower shows. It is round and beautifully molded and as purely white as the marble from which it takes its name. It is in all ways an enchanting Tulip. Now available at a most reasonable price. Height 29 inches.

Claudius Pernet *Doz. \$1.65, 100 \$11.50*
A very bright orange-buff with paler shadings. The yellow base with its olive-green ring adds to the beauty of this variety. It has been greatly admired in our trial gardens for three years prior to its introduction in 1939. Height 27 inches.

Crimson Rambler *Doz. \$1.20, 100 \$8.50*
Dark deep scarlet. The flowers are long in form and of great substance, lasting exceptionally long under the most trying conditions. The height 27 inches and its stiff stem makes it perfect for beds or border planting. A new variety for 1939.

***Dido** *Doz. \$0.70, 100 \$4.75*
Here is a perfect flower. Glorious in its extraordinary luminous light effects and its long and slender form, poised firmly at the top of its tall straight stem. It strikes everyone as one of the wonders of the world of Tulips. Color is deep rich pink or light jasper-red, with topaz lights and amber edges to the

petals, the base and anthers pale corn-yellow. A lovely combination of shades and sweetly fragrant. It has no peer. Where a bright color effect is needed it is superb. Height 32 inches.

Golden Statue *Doz. \$1.90, 100 \$12.50*
A pale yellow Tulip of tremendous size, oval-shaped flower, stem tall and stiff. The inner petals are pale yellow, the outer petals are darker. We consider this one of the loveliest late yellow Tulips. Height 28 inches.

Mayflower (True) *Doz. \$0.95, 100 \$7.00*
It is a beautiful fiery scarlet with glittering black center, reminding one of the brilliance of the Oriental Poppy, and is a result of a cross between Gesneriana Spathulata and the Botanical Tulip, Greigi. One of the latest of the May-Flowering Tulips to bloom. Height 30 inches.

Mazeppa *Doz. \$1.65, 100 \$11.50*
A most brilliant Tulip. The flowers are extremely large and globular and of wonderful substance. Color, an intense, glowing bright scarlet. A group of these are most striking, and would be splendid with white or against a green background. Height 28 inches.

***Moonlight** *Doz. \$0.75, 100 \$5.50*
Pale yellow of a lovely color; the flower is very long and of fine oval shape. Beautiful in the border among Irises or Bleeding Heart. Height 25 inches.

Mongolia *Doz. \$4.00, 100 \$29.50*
This we consider one of the best of the recent introductions; it is one of the largest deep yellow varieties in existence. The flowers are egg-shaped, of great substance and carried on tall, strong stems. While the yellow color of this beauty is rather deep, it has a tone of softness, making it extremely desirable. Height 32 inches.

***Mrs. F. E. Dixon** *Doz. \$2.30, 100 \$15.50*
Of immense size, artistic and lovely in form, the softly colored, sulphury yellow bloom is carried upright on strong, stiff stem. The petals have a waxlike texture and are of a substance rarely met with. Excellent in every way, undoubtedly the finest of the Cottage Hybrids. Height 28 inches.

Mrs. John T. Scheepers *Doz. \$2.15, 100 \$14.00*
Elegantly formed, oval-shaped, large flowers of deep golden yellow, very clear of color, are carried on tall, thick, sturdy stems with clear green foliage. The entire plant is of the strongest development. The blooms are enormous with petals of unsurpassed substance and of fine lasting quality. A real giant among Tulips. This magnificent variety is recognized by experts as one that especially suits the American climate. Awarded highest honors whenever exhibited.

***Mrs. Moon** *Doz. \$0.75, 100 \$5.25*
One of the best tall yellow Tulips. Beautiful vase-shaped flowers, carried on sturdy stems. Blends well with deep purple Irises. Height 25 inches.

Mr. Van Zyl *Doz. \$0.85, 100 \$6.50*
Superbly beautiful. This Tulip reminds one of the favorite Rosabella, but is of deeper color. Should be in every garden. It possesses long-lasting qualities and has a fine strong stem. One of the choicest pink varieties. Height 28 inches.

Nectarine *Doz. \$1.60, 100 \$11.00*
Another fine yellow among the new Tulips—a delightful primrose shade, flushed with apricot at the edges. A very attractive variety, splendid when planted in combination with mauve color. One of the choicest pink varieties. Height 28 inches. (Color illustration, page N.)

***Orange King** *Doz. \$0.70, 100 \$4.75*
Glistening deep orange, shaded rose, inside deep orange-scarlet with yellow base; sweet scented flower of great size and brilliant coloring. Height 23 inches.

Long, clear white. The petals, which are pointed and elegantly reflexed, are beautifully margined and penciled on edges with bright pink. Height 26 inches.

Queen of Spain *Doz. \$3.50, 100 \$24.50*
A charming cream-colored flower delicately flamed and feathered with pink and light rose. There is no other Tulip which can compare with this lovely variety. Flowers have excellent substance; stem strong and wiry. Truly a jewel of rare beauty. Height 25 inches.

Ramona *Doz. \$1.85, 100 \$12.00*
Finely formed, oval-shaped flowers of clear, pale pastel yellow, superbly poised on tall, sturdy stems. Rosabella *Doz. \$0.75, 100 \$5.50*
There are few Tulips that can match this flower. Its color may be described as a delicious pink, warm, delicate yet rich, handsome as a pink rosebud with a blush of deeper color suffusing each petal, and smart black anthers. Not overly tall, yet it carries itself nicely on a stem of 27 inches. An engaging combination with Phlox divaricata or a pale yellow Iris.

Santiago *Doz. \$1.45, 100 \$10.25*
Creamy white with a tinge of rose when fully matured; inside lemon-yellow. Dark yellow base and anthers. 25 inches.

Yellow Emperor *Doz. \$2.00, 100 \$12.75*
A brilliant butter-yellow, rather long flower, considered by many one of the best yellow Tulips for garden planting in this shade. The flower is substantial, well formed and large. The foliage is short and not prolific, making this a very suitable variety for planting with Pansies, Forget-me-nots, or Dwarf Phlox. Height 26 inches.

***Mixture of Cottage Tulips** *Doz. \$0.65, 100 \$4.50*
This mixture contains many lovely varieties and will give you an abundance of cut blooms at very low cost. Only the best kinds, properly blended, are used in this mixture.

Multi-Flowered Tulips

Bunch-flowering or Multi-flowered Tulips are a most interesting lot. Instead of producing the conventional single stem with one bloom on top the varieties offered under this heading all grow a strong main stem with from 3 to 6 branches, half way up the stem, each side shoot or branch carrying its own flower. The result is that 3 to 6 or sometimes 8 flowers are obtained from one bulb. All the

blooms are of good size, are gracefully spaced and as you can well imagine, produce an unusual effect and a great mass of color. The soil must be kept rich because if planted in poor ground they will not be as floriferous.

All the varieties offered are most attractive, some very unusual in their coloring.

Mixed Colors *Doz. \$1.30, 100 \$9.25*

Lily-Flowering Tulips

The Tulips offered under this heading have been kept by themselves because of their distinct Lily-like flowers. They really belong with the Cottage Tulips but would be lost or difficult to find if offered in that already quite large group.

Lily-flowered Tulips bloom the same time as the Cottage Tulips and are best used where a light, airy and graceful effect is desired. The delicately curved petals give a delightful effect. As a flower for cutting, it surpasses the regular Tulip because they are so much more graceful. Don't miss planting a few this year. The most complete list in existence is offered here.

***Captain Fryatt** *Doz. \$2.00, 100 \$12.75*
Dark ruby-violet with violet-blue center, strong reflexed petals. The only Tulip of this color; this is a most attractive Lily-flowered Tulip. Height 24 inches.

Peony-Flowered Tulips

These flower at the same time as the Single Cottage Tulips. They are thankful for a little shading against the hot midday sun which will enable them to carry their heavy blossoms erect.

All are about 27 inches in height and of remarkably robust habit, resisting disease or all sorts of ailments. Their coloring is unique and most attractive, Inga Hume being greatly admired at London, Paris and Berlin flower shows.

Easily forced and grown indoors and tremendously long lasting; both indoors as well as out. In the garden they will outlast any Tulip in existence. The bulbs multiply rapidly. May we suggest you plant a few this fall.

Chinese Lantern Tulips

Imagine a handful of Tulips having the delicate pure pastel shades of our finest Sweet Peas and you have but a fair description of their colors. The general effect, however, is that of lighted, delicately colored Chinese Lanterns. The perfectly formed globular blossoms glow with an iridescent light not heretofore seen in Tulips. The colors are too exquisite to accurately describe. They have been admired by visiting growers from all over Europe.

The colors are all in those elusive tints of salmon, orange and salmon-pink of the most delicate pastel shades, yet brilliant and vibrant with life.

Mixture of Chinese Lantern Tulips, 4 *Doz. \$1.10, 100 \$8.00*
We know of no group of Tulips which would blend as well as the Chinese Lanterns and we therefore are offering a carefully hand-made mixture of this delightful strain.

Three Oldest Tulips

- Gala Beauty** Doz. \$1.10, 100 \$8.00
Early 1600. Golden yellow with carmine-red flaming pointed flowers carried on 23-inch stems. The unusual coloring blends with white Tulips.
- Zomerschoon** Doz. \$3.75, 100 \$27.25
Early 1600. Delightfully attractive and dainty Tulip still considered to be one of the finest. The blooms are salmon-rose, flaked creamy white. Height 22 inches.
- Green Knight** Doz. \$1.10, 100 \$8.00
Early 1700. Most unusual blending of pale yellow and apple green. The flowers are pointed and graceful, blending beautifully with yellow or pink Tulips. Height 22 inches.

Parrot Tulips

The old varieties are not recommended, but you will like to have some of these new quaintly shaped flowers, particularly for house decoration or for clumps here and there in the border or where you have strong groups of evergreens. Their artistic form and coloring make them especially suitable for cut-flower purposes. Fantasy is recommended for pot culture also. Forced slowly in not too high a temperature it develops into one of the most unusually handsome pot plants ever seen.

- Blue Parrot, 1** Each \$0.90, Doz. \$9.00
A glorious Parrot Tulip of bright violet shaded steel blue. The unusual flower is large and carried erect on a strong 30-inch stem. A rare novelty. (Color illustration, page J.)
- Capriccio, 1** Doz. \$2.30, 100 \$15.25
Salmon-pink feathered and flamed white. A truly fascinating flower carried on 27-inch stem.
- *Eleanora, 1** Doz. \$3.75, 100 \$27.25
A purplish violet Parrot Tulip of great substance, extremely large flower with heavy petals. Free flowering, strong and stiff stem; very fine.
- *Fantasy, 1** Doz. \$0.75, 100 \$5.50
The gorgeous pink Parrot Tulip. A sport of Clara Butt, with the same habits, height, strength of stem and time of flowering. The flowers are of unusual and beautiful form, the petals being lacinated, having curious excrescences on the outside. It is not only the rare form of this Tulip or its main color, which is a soft rose-pink; the shadings of the cup are a deep velvety rose color which is more sumptuous than words can tell. The encrustation of back of petals often carries a delightful shade of apple green. Stiff straight stem. Very lovely with Scilla campanulata, Excelsior. Height 26 inches. (Color illustration, page J.)
- *Gadelan, 1** Each \$1.25, Doz. \$12.50
A sensational flower, reminding one of a Cattleya orchid in color and shape. When fully developed it often measures seven inches across with a blending of blues and purples, edged white with blue-green markings. The inside of the flower is bright violet-purple with white center and contrasting black anthers. Fine sturdy stems. Height 22 inches. (Color illustration, page J.)
- Gemma, 1** Doz. \$1.10, 100 \$8.00
White flushed apple-blossom-pink. A very good new Parrot Tulip, much loved as a cut flower.
- Lady Derby, 1** Doz. \$1.60, 100 \$11.00
Very similar to Fantasy but lilac in color. The petals become lighter towards the edges.
- Opal Queen, 1** Each \$1.35, Doz. \$13.50
Here we come close to perfection. A flower of remarkable size, colored a delicate and beautiful pearly blue. The stem is 27 inches tall and carries the flower very gracefully. A rare novelty.
- Sunshine** Each \$4.50

- Therese** Each \$0.75, 3 for \$2.10, Doz. \$8.25
Bright cochineal carmine with green markings on outside. Inside of flower is a vivid cerise-scarlet with white center tinted blue. This variety is the Parrot form of Darwin Tulip Farncombe Sanders. A brilliant and most interesting Parrot Tulip. Height 30 inches. (Color illustration, page J.)

Bizarre and Bybloem Tulips

(Old Dutch Tulips)

Bybloem and Bizarre Tulips are "rectified" Breeder types. The Tulips are of an old race which has been grown in Holland and in France since the beginning of the seventeenth century, and which caused the famous Tulip craze in 1635. The Bybloems are queerly striped and feathered rose or violet on a white ground. The Bizarres have dark brown stripes and feathering on a yellow ground. They flower about the same time as the Breeder and Darwin Tulips but do not grow quite so tall, and are seen at best advantage when planted in clumps in the herbaceous border or among evergreens and shrubs. They are above all sensational show Tulips. All form rare artistic beauty.

***Bizarre and Bybloem Tulips Mixed** Doz. \$0.85, 100 \$6.50

Rembrandt Tulips

Rembrandt Tulips are nothing more or less than Darwin Tulips in which white, lavender, red and other colored stripes or flakes have appeared. The blending of colors is at all times in perfect harmony and most attractive and colorful. They are especially fine when used for cut flowers. They bloom at the same time as the Darwins and require the same care. We advise their use in mixture only.

American Flag (Old Glory), 2 Doz. \$3.50, 100 \$24.50
Brilliant deep red with broad marbled white lines and markings. The flowers are large, excellently shaped, and on long stiff wiry stems. Most brilliant and unique Tulip. Blends exceptionally well with white flowers. Height 28 inches.

***Finest Mixed Rembrandt Tulips** Doz. \$0.85, 100 \$6.50

Chameleon Tulips

Here we have a collection of new Tulips which in form and shape resemble the Darwin Tulips; the coloring, however, reminds one of the Cottage Tulip Picotee.

When Chameleon Tulips first come into bloom they show only faint tracings or delicate margins of pink on the edges of the flower petals, with the development and consequent aging of the bloom these markings enlarge and gradually spread over the entire flower. The blossoms never look the same from day to day and it is truly fascinating to watch this change of color taking place.

Amie Newell, 2 Doz. \$1.30, 100 \$9.25
Opening white with a beautiful bright wine-red border, later suffusing the entire flower to a clear wine-red. A flower of perfect Darwin Tulip form. Height 22 inches.

Fanny Fisk, 2 Doz. \$1.30, 100 \$9.25
White with light red border on each petal. One flower often differs from the other in coloring; sometimes some of them will turn red. This has always been one of the most attractive varieties in our Chameleon collection. Height 25 inches.

Ossi Oswald Doz. \$1.45, 100 \$10.25
Opening creamy-white delicately flushed rose, when fully developed the flower is a clear rose shade. This is an exceptionally beautiful variety when used for forcing in pans in early February. One of our favorites. Height 26 inches.

Peasant Maid, 2 Doz. \$1.30, 100 \$9.25
Opening white and rose, becoming a lovely rosy red when in full bloom. This variety has been greatly commended by all who have seen it. Large flower of good substance, which is carried on a strong stem. Height 23 inches.

Wayside Wonder, 2 Doz. \$1.30, 100 \$9.25
Opening pure white with a delicate deep red picotee edge. This narrow band of color spreads and becomes more beautiful as the flower ages, softening in tone until the entire flower has turned to rose-pink. Then as well as at opening it is a delightfully lovely Tulip. Height 24 inches.

***Chameleon Tulips in Mixture of the Above Varieties** Doz. \$1.10, 100 \$8.00
As well as many others not yet offered.

Single Early Tulips

Few, if any, of the spring-blooming flowers rival the Single Early Tulips for brilliancy of bloom or ease of culture. They are excellent subjects for formal beds on the lawn or for garden borders. While they do not possess the same size of bloom and length of stem as the May-Flowering Darwin, Breeder, and Cottage varieties, they are used where earlier blooms are desired. Many of the varieties may be forced into bloom in January, while all of them may be easily had in flower in pots late in February or early March.

Note: The letters A, B, and C following the varieties indicate their relative earliness of bloom, but, with few exceptions, most of the varieties bloom outdoors about the same time when planted in masses. The figures indicate the height in inches.

Bright vermilion-scarlet, same color as Vermilion Brilliant, but larger and of great substance. Splendid early forcer, flowering easily for Christmas.

5 Famous Lilies Anyone Can Grow

Lilium Testaceum

Also known as "Excelsum" and as the "Nankeen Lily." One of the choicest garden Lilies. The warm apricot tone, almost a cafe au lait, set off by brilliant orange anthers, puts it in a color class by itself; in fact, many people consider it the most graceful and lovely of all Lilies. It is beautiful for every kind of garden use but because of its tender coloring, must be planted in a mixed border with brighter flowers. In combination with light-shaded Delphiniums or with the Madonna Lily, which it resembles, it is most effective. It has the texture of *Lilium Candidum*, with reflexed petals and does well under the same conditions as *Candidum*. Four to five feet high, June-July flowering. (Color illustration, page O.)

Lilium Candidum

(Madonna Lily)

The Madonna Lily is one of the loveliest of white Lilies, popular throughout the world, loved and admired by all. Its delightful fragrance and lovely white flowers have made it a universal symbol of purity. Plant it in groups of three or more bulbs, close to the pale blue Delphinium Belladonna. It will be the loveliest spot in your garden during late June and early July. Madonna Lilies are simple to grow if you will plant in full sun and perfectly drained soil. Most Madonna Lilies are grown in France. Bulbs from the north of France are better than those grown in Southern France. We offer, therefore, Northern France grown bulbs as follows:

Lilium Philippinense

Not unlike the Regal Lily in general appearance. The slender stem is covered with the same grassy foliage as the Regal Lily. The substantial blooms are trumpet-like; in fact, they are long, lovely white flowers, with a beautiful pale emerald-green throat which gives the flower a distinct and delicate appearance. They commence blooming in early August and flower until stopped by frost. Bulbs when established will produce three to four spikes each with four to five blooms. It is a most liberal flowering Lily, to all of which may be added that they are among the easiest grown. September flowering. (Color illustration, page O.)

Each \$0.35,
Doz. \$2.75, 100 \$18.00

The Regal Lily

One of the grandest of Lilies. They have a mysterious way of at night-fall sending out their fragrance in puffs, while at all times having a delightful odor when "nosed."

Sunset Lily

Lilium Pardalinum Giganteum

Vigorous, hardy, of easiest culture, and dependable. Much more cannot be said. Under ideal conditions the stalks attain 7 feet, clothed with luxurious foliage and bearing a dozen or more beautiful flowers in July. The petals are somewhat recurving, and a brilliant sunset-red, base of flower yellow heavily spotted with small brown dots. The "Sunset Lily" is one of the most satisfactory ever grown.

Each \$0.35, Doz. \$3.50

Lilium Regale

(The Regal Lily)

One of the most beautiful and one of the hardiest Lilies in cultivation—"Lilium Regale" is truly a Royal Lily, worthy of a place in every garden; it is a lover of loam and sunshine. A vigorous grower with sturdy stems, 4 to 6 feet high, densely covered with fine foliage. Center of flower flushed with yellow shading to white at outer edges; externally the flowers are streaked with brown on the "ribs," shaded through the almost translucent petals with a delightful pearly tint; the contrast between the color of the reverse of the petals and the gold shading of the throat is extraordinarily beautiful. The Regal Lily is very floriferous and when thoroughly established, bears as high as 18 to 20 flowers during the season.

Fall-planted bulbs should be protected against freezing. (Color illustration, page P.)

Lilies for the Garden

Lilies, unlike Tulip bulbs, are not all grown in one locality under one and the same conditions, but are gathered together from many foreign countries. All ripen off at different times of the year; therefore, orders for Lilies can not always be filled at one time. The requirements of Lilies vary with each variety. We have a booklet on their culture, which will be sent to you upon receipt of 25 cents.

It blooms two weeks after the Regale Lily; many flowers opening at one time. We have counted 35 perfect flowers and buds on a six-foot spike. Sweet Scented Hyacinths

Most Versatile and Colorful of Bulbs

Properly used, there are few flowers which will give more satisfaction than Hyacinths. Sweetly scented, with a fragrance everybody loves, each Hyacinth bulb is a storehouse of energy and will produce its flower even under the most adverse conditions. The size of the flower is directly dependent on the size of the bulb and for that reason it is important to use the size suitable for the use in mind.

For garden use we recommend the 15 to 16 centimeter, as well as the 17 to 18 centimeter size. Properly selected varieties will produce strong-stemmed flowers capable of withstanding wind and rain without support. The flowers from these smaller sized bulbs will be of perfect form, but not so heavy as those produced by the largest size bulbs.

Hyacinths in the spring garden give a gay range of color impossible to obtain so early in the spring in any other way. Their delightful fragrance is something to look forward to from year to year. Plant them in informal masses interspersed with other spring flowers, preferably where they will have some sort of background against which to display their vivid beauty, or by themselves in solid beds of one or more colors. Because they are so uniform in height and so dependable they are ideal for beds where it is desired to carry out a living design.

During the winter months Hyacinths may be had in the house with ridiculous ease. All they require is water and some sort of supporting medium which may be of bulb fiber, stones, or soil. With special Hyacinth glasses, readily obtainable at small cost, they can be grown in water alone as shown on the opposite page. With our special bulb fiber they do not need to be grown in ugly looking flower pots, but may be grown in any ornamental container.

For all indoor uses and for exhibiting at shows we recommend the top size bulbs of 19 centimeters and larger. The enormous trusses produced by the extra vitality contained in these larger bulbs can reach the height of perfection under these protected conditions, and the increased satisfaction is well worth the extra cost of a few dozen of the largest size bulbs.

Hyacinth Glasses,
Prices On Request

These Flowers are Grown by Hyacinth Bulbs Measuring 17 to 18 Centimeters—the Variety is L'Innocence

Growing Hyacinths in Water

Use only top size 19-centimeter bulbs.

Open the bags upon arrival, and place in a cool, dry place until December 1st. The preferred storage temperature is 50° F., but 60° F. is allowable.

Before placing the bulbs on the well-known Hyacinth glasses, or Mason jars, the rootbase must be cleaned, so that all residue and old roots are removed. Fill the glasses with clean, cool water until the rootbase is touched. The glasses or jars are then placed in a cool, dark closet or cellar until the top growth is 4 inches above the bulb. This takes about 8 weeks. Preferred temperature not over 50° F.

When 4 inches top growth has been made, the glasses may be taken to a window in the living room, and if necessary some water can be added; never change the water completely. Hold temperature to not over 70°.

Most gratifying and interesting results can be obtained by following these simple rules.

Hyacinths for Garden Planting

CAREFULLY CHOSEN NAMED VARIETIES IN DISTINCT COLORS
ALL FLOWERING AT ONE TIME

The two most satisfactory sizes of Hyacinth bulbs for garden planting are those bulbs which measure about 15 to 16 centimeters and a little larger size, measuring 17 to 18 centimeters. The most popular of the two is the smaller size, or the 15- to 16-centimeter bulbs, and rightly so. They are from 30 to 40 per cent cheaper and produce excellent and colorful effects. The spikes are not too heavy and they will not fall over when in full bloom. Planted in beds they make a cheerful display of color as soon as the snow goes, 4 to 6 weeks ahead of the Darwin Tulips. Hyacinth bulbs

measuring 17 to 18 centimeters give somewhat larger trusses and make a fine showing in the border and beds. They are also very satisfactory for forcing or indoor growing.

The varieties which we offer here for garden planting represent the best kinds for that purpose in their respective colors. They have strong stems, good clear colors, last a long time in bloom. The bulbs may be left in the ground and will give a good account of themselves for several years to come.

Hyacinths in the Garden—Something Fragrant and Colorful

French Roman Hyacinths

The early Roman Hyacinth, with its graceful spike of fragrant bells, is one of the earliest of all winter-flowering bulbs.

They may be placed in the more artistic ornamental bowls, using our prepared Bulb Fiber as a filler, which only needs to be kept continually moist, requires no additional fertilizer, and in which the bulbs thrive and bloom luxuriantly. Bulbs planted in September bloom in December.

Multiflora Hyacinths

By a special cultural treatment in Holland, Hyacinth bulbs can be grown which will produce from six to ten excellent flowers on one bulb. They are easily grown in Wayside Gardens Bulb Fiber or earth. Cultural instructions will go with each order. Don't pass up the opportunity of having several clusters of fragrant, colorful flowers this winter. They may also be grown in the garden where one bulb will produce a cluster of blooms which are very showy and fine for cutting.

Spring-Flowering Dutch Crocus

The finding of these Crocus in bloom is one of the genuine delights of life. Though we may eventually plant them by the thousands or may have been so long at gardening that little surprises us, yet that first Crocus is a great event. And we suggest that in every garden, no matter how large or how small, there be some definite Crocus corner which we can watch during those early days of March. **Prices quoted are for top size bulbs.** The larger the bulb, the greater the number of blooms.

Colchicum - Meadow Saffron

(Giant Autumn-Flowering Crocus)

Colchicum are autumn-flowering bulbs with large Crocus-like blossoms which appear during the months of September and October, without foliage. The foliage, however, appears early in the spring about the same time the Tulips and Hyacinths are in bloom and disappears in June. They are especially recommended for planting between the taller growing rock plants such as Cerastium, Vinca, Pachysandra, and the various Sedums, where their bold, checkered Crocus-like blossoms are seen to the best advantage. Blooming in September and October when flowers in the rockery are scarce, they are especially valuable. They may also be planted in the open woods or in naturalistic plantings of any sort. The bulbs, if kept indoors, will bloom during September and October in the window without any earth or water and after blooming, the bulbs may be planted in early November outdoors, and will not suffer in the least.

Spring-Flowering Crocus Species

Besides the Dutch Crocuses there are certain species that bloom very much earlier in the year, often before the snow has gone.

Crocus Imperati, pale lilac with buff jackets, often flowers in late February, and is closely followed by Crocus Sieberi, a fuller, purer mauve sort; it has as a companion the deep rich yellow Crocus Susianus, which is even more attractive in the bud stage with its dark, rich brown flowers on the exterior of the segments. Once planted, they will take care of themselves for many years. Then comes Crocus Tommasinianus, an exquisite vaselike form, in color varying from a pale mauve to quite a rich purple.

Charming in the rock garden planted between Sedum or other creeping plants.

Colchicum Speciosum

Wayside Gardens Bulb Fiber

(Patented)

A Charming Method of Growing Spring Flowers For the House

Culture: Moisten the fiber to saturation, fill the bowl with the soaking wet fiber mixture up to the rim and plant the bulbs in the same manner as with ordinary soil. A little fiber should be shaken down into place after planting but should not be pressed down too tightly or the bulbs will be forced upwards when root growth commences.

After planting, adopt either of the following plans:

The bowls may be placed in a cold frame, airy cellar or in a dark or moderately dark, cool room. It will not be necessary to give a great deal of water; perhaps once every 2 weeks.

For the first weeks after planting, additional water should be given sparingly, sufficient only to encourage root action. As soon as the bulbs are well rooted, water should be given more

freely. If the mixture is allowed at any time to become dry, the flower buds may go blind. Should by any chance too much water be given, the bowls may be drained by tipping them on their sides.

When the bulbs have made a good top growth in the dark, the bowls should be placed in a sunny window where they will get the morning sun. Never place bowls on top of radiator cover. A temperature of 55 to 60 degrees is sufficient to obtain good blooms; the bulbs resent too warm a temperature.

Complete Planting Instructions for all the varieties we have suggested will be sent with each order.

THE BEST BULBS TO GROW IN WAYSIDE GARDENS BULB FORCING FIBER

Hyacinths do wonderfully well in this fiber. All the varieties offered in our catalog may be used.

Roman Hyacinths, 5 or 6 in a bowl, make a very charming table decoration, and if potted early in September may easily be had in bloom by middle of December.

Paper-White Narcissi, Soleil d'Or Narcissi. Grow much stronger in our fiber than they do in pebbles. The flowers also last longer.

Poetaz Laurens Koster, Poetaz Frans Hals. Charming specimens for house decoration grown in bulb fiber in bowls. They are deliciously perfumed and specially recommended. Should be grown in the same manner as Roman Hyacinths.

TRUMPET DAFFODILS

King Alfred. The merit of this variety is that it blooms early, and by planting in the beginning of October it may be had in bloom from about January onwards.

Emperor always makes a handsome display, but as the bulbs are large it is desirable to have a large and deep bowl to put them in.

Aerolite and Spring Glory are favorite varieties. They always do well.

SINGLE EARLY TULIPS

Special care is required to see that they do not get dry at the roots because if this happens the pores of the roots close up and flowers fail.

Pink Beauty. Pink. **Mon Tresor.** Yellow.
De Wet. Copper. **Brilliant Star.** Scarlet.

DOUBLE EARLY TULIPS

Mr. Van Der Hoef. Yellow.

Peach Blossom. Rose-pink.

Murillo. Pink.

Tea Rose. Saffron-yellow.

LILY-OF-THE-VALLEY are easy subjects and having such graceful flowers are strongly recommended.

CROCUSES. Sieberi for January bloom.

Rodopel

The Rodent-Repelling Peat Moss

Protects Bulb Plantings

Against ravages of rats, mice, moles and other destructive rodents. Rodopel is a new material so highly distasteful to rodent pests that they refuse to go near it in their search of food. Three years of study in laboratories and in the plantings of nationally known bulb growers have shown that damage by rodents is wholly eliminated when Rodopel is used.

How to Use Rodopel

Instructions in each package simple.

Rodopel Is—

Harmless to bulbs. Harmless to other vegetation. Non-poisonous. Clean and pleasant to use. Odor pleasant to humans—distasteful to rodents.

2-gallon can, sufficient for 100 bulbs, \$2.00

5-gallon can, sufficient for 250 bulbs, \$3.75

Recommended for all bulbs liable to be eaten by rodents.

For your convenience in applying Rodopel it is impregnated on high grade peat moss which aids in preparing the bulb bed.

The Time to Plant Hardy Plants

ONE of the most often asked questions is: When is the right time to plant, the autumn or the spring? The answer to this question depends entirely on the material to be planted, the location it is to be planted in, and the time when the question is asked.

The autumn is the better time to handle all plant material of unquestioned hardiness. In the fall, weather and soil conditions, as a rule, are better than in the early spring. A little covering of excelsior or clean dry straw is all the winter protection required.

Here are a few planting suggestions:

Plant Rock and Border Plants from September 1st to November 1st. Roses from October 15th to December 1st. Peonies, Pyrethrums, German and Japanese Iris from September 1st to frost. Oriental Poppies from August 15th to October 15th. Dutch bulbs from September 15th until ground is frozen. Lilies immediately when received. They are shipped throughout the fall until December 15th.

Always remember that the best time to plant any hardy plant or rock plant is when it is dormant. Most Hardy Plants are dormant in our country early in September immediately after the hottest and driest days of the summer are over. Transplant them just before they commence their new fall growth. It is our practice to ship only at the season when they will give best results. If you lack experience, order early and leave the responsibility of shipping with us.

Every order in the autumn is carefully examined, material and location carefully considered, and shipment is made only of such as can be transplanted in your part of the country at that particular time, the balance is carried over by us and sent to you in the spring. This work of examining is not left to employees; it is done by a responsible official of the company with many years of experience.

Autumn Planting Guaranteed

Inasmuch as the autumn is the better time to plant most Hardy Plants, we urge you do all planting possible from September 15th to end of October. We will replace free of charge, the following spring, plants sent you this fall that might be

winter-killed. We assume all responsibility, but, of course, you will give plants the required care and protection and not hold us responsible for personal carelessness or neglect. When reporting losses in spring, mention order number, please.

Hardy Plant Catalog

Only a limited number of plants are offered in this bulb catalog. If you do not have our Plant catalog we will gladly forward a copy. It's a 160-page handbook with full cultural directions offering the most up-to-date collection of hardy plants

May be Purchased From All Reliable Nurseries. Each Plant has Patent Label Attached.
None Genuine Without. Quality Guaranteed by Us

COLUMBIA

(Plant Patent No. 118)

*—the finest light pink
phlox ever introduced*

The color suggests a delicate cameo-pink with faint blue shading at center. The effect created by a well-grown plant is exquisite and never before seen in Phlox.

The clearness of tone is remarkable, the brilliancy is so pronounced that immediate attention is given to this wonderful plant. As the flower ages, the blooms always retain their delicate pink shade; there never are any magenta tones visible.

Out of each leaf joint grows a lateral or secondary flower spike continuing the display of blooms long after the main flower head has disappeared. Columbia, is, therefore, well called the "perpetual flowering" Phlox.

Per 3, \$1.10; per doz., \$3.30; per 100, \$20.00.

A New Phlox

As White as Driven Snow

In addition to the two varieties offered above, we suggest the following new variety for a place of honor in your garden:

MARY LOUISE

Pure glistening snow-white heads of unusually large size, the individual flowers are twice as big as in other white Phlox. A perfectly beautiful variety; unquestionably the best white to date. It is a good grower with clean foliage. Of medium height.

Per 3, \$1.50; per doz., \$4.50;
per 100, \$30.00.

Only a limited number available for distribution in 1939.

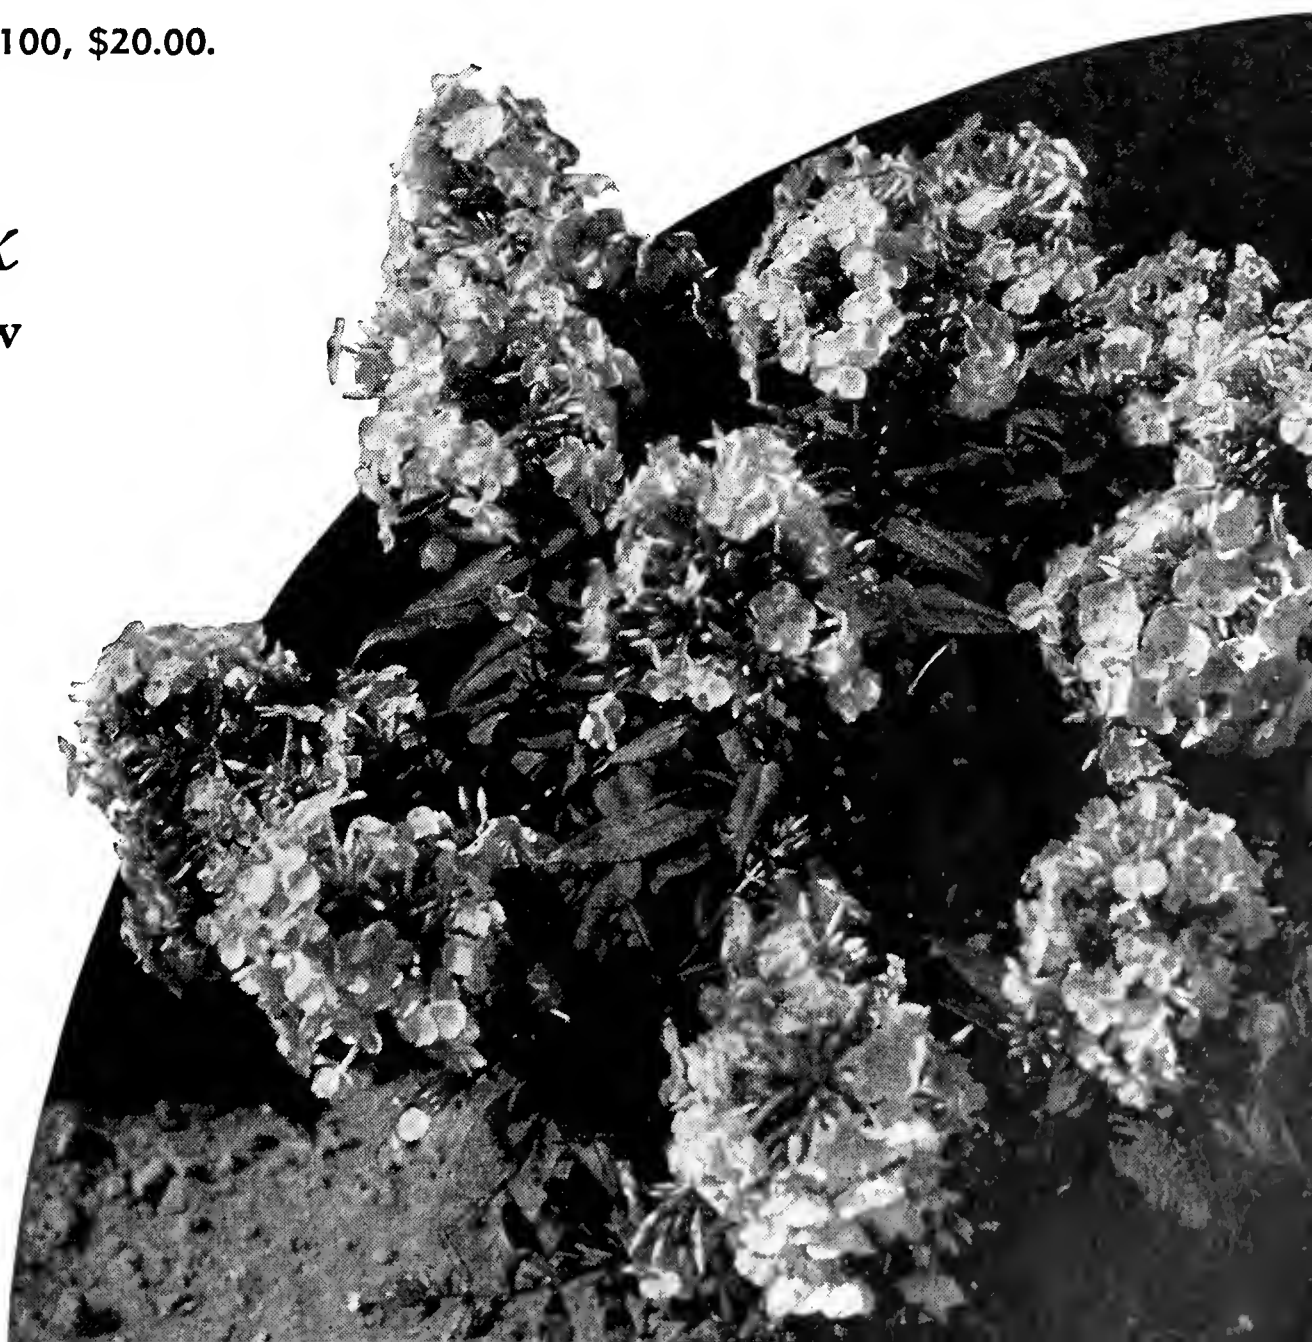

AUGUSTA

(Plant Patent No. 252)

*—the finest American-Beauty-red
phlox ever introduced*

A strong growing plant of medium height, about 2½ feet when fully grown, with rich bronzy green foliage and stem. Color is best described as a brilliant cherry-red, not quite as deep as Beacon and much more intense and sparkling. The young florets at opening show a decided amount of orange. Unlike most Phlox of this color, it does not discolor or bleach in the sun. The color remains perfect under all weather conditions. Augusta is a beautiful vivid colored variety of exceptional growth and qualities, and will eventually replace all other varieties of similar shade.

Per 3, \$1.50; per doz., \$4.50; per 100, \$30.00.

Hardy Herbaceous Plants

A limited selection of varieties, all of which should be planted in the autumn

OUR COMPLETE HARDY PLANT LIST, FULLY ILLUSTRATED, SENT UPON REQUEST

DELPHINIUM - Larkspur

Stately and handsome summer-flowering, herbaceous perennials of unsurpassable beauty. Few plants lend a greater attraction to the border in early summer. Fortunately they can be grown in every garden, but in warm, dry parts of the country they do not live long. Best results are obtained in our cooler regions, especially along the Pacific and Atlantic coasts.

Culture. Delphiniums require a rich, generous and well-drained soil. On soils of a light or medium nature dig in plenty of well-decayed manure. In those of a heavy nature it is desirable to fork up the sub-soil and compost of two parts loam and one of equal proportions of decayed manure and sand. The plants are best grown in groups of three or six. Allow a distance of at least 18 inches to 2 feet between the plants. Planting may be done in autumn or early spring. Remove faded flowers, and on no account allow seeds to develop, then a second crop of flowers may be expected later on.

ENGLISH DELPHINIUMS

Visitors at our nursery proclaim them the best they have ever seen. Those who wish to perfect their already much prized borders cannot afford to overlook these wonderful hybrids. Sutton's Hybrids Three \$1.50, Doz. \$4.50, 100 \$30.00

This is one of the newest and at present the most popular strains of the garden Delphinium. It is distinct because of its broad, conical spike and enormous individual flowers, 1½-2 inches in diameter, in all shades of blue blended with mauve and violet. Also contains some fine clear white types.

Blackmore and Langdon Hybrids Three \$1.40, Doz. \$4.00, 100 \$25.00

This English strain is one of the finest developments in the Delphinium family. The flowers are enormous, produced on solid, erect spikes of great height and rigidity. The colors lie in delicate shades of blue, mauve, and pink. Combines landscape value with a grace and elegance for cutting unsurpassed in this family of plants.

Gold Medal Hybrids Three \$0.95, Doz. \$3.00, 100 \$18.00

They are made up from many strains and are a fine mixture for an inexpensive planting.

Cliveden Beauty Three \$1.40, Doz. \$4.00, 100 \$25.00

This is a fine English improvement over the common Belladonna. Growing much taller, many more flowers to each spike and of a brighter color. Altogether a fine improvement.

Fanny Stormonth Three \$1.40, Doz. \$4.00, 100 \$25.00

A lovely pale blue variety growing about four to five feet high, producing its flower spikes in goodly numbers. One of the best kinds of its color.

Lamartine Three \$1.10, Doz. \$3.30, 100 \$20.00

The rich indigo-blue flowers are freely produced on branching stems. Excellently suited for cutting as well as for colorful effects in the garden.

DELPHINIUM BELLADONNA

The Belladonna Delphinium does not grow quite as tall as the popular English Hybrids, but they produce more spikes and are more graceful, therefore, more useful for cutting. In fact, they are our loveliest early blue flowers for that purpose. They require the same care and treatment as suggested for the English Hybrids, but may be planted a little closer together, 12 inches apart is sufficient space for them. Their lovely blue spikes are about 3 or 4 feet high and produced in June and again in September.

DELPHINIUM CHINENSE - Chinese Delphinium

The Chinese Delphiniums differ materially from the Belladonna or English Hybrids. They rarely grow over three feet in height and bloom about three or four weeks later. The foliage of this variety is almost fernlike, the plants are more graceful and the flowers, which grow in panicles, are of an intense gentian-blue. A lovely thing for the border. Require same treatment as English Delphiniums. They should be planted about 10 to 12 inches apart. Their roots are much smaller than those of the English Hybrids.

Chinense Three \$0.95, Doz. \$3.00, 100 \$18.00

A very pretty variety, with fine, feathery foliage and intense gentian-blue flowers in open panicles.

Chinense album Three \$0.95, Doz. \$3.00, 100 \$18.00

A pure white form of the above.

WHITE HYBRID DELPHINIUMS

Iceberg Three \$1.10, Doz. \$3.30, 100 \$20.00

Here at last we have a White Delphinium. The flowers are semi-double, double and single white on 6-foot stems. Graceful enough for cutting, still tall and sufficiently substantial to make noble garden plants. They are of easy culture and look splendid combined with the blue hybrids. For a succession of blooms, do not permit seed to form.

HEMEROCALLIS - Lemon Lilies

Beautiful hardy perennials belonging to the Lily order. For generations great favorites in all gardens, both here and abroad. The numerous species have long, narrow leaves and yellow or orange flowers, many of which possess a delicious fragrance. Very graceful and stately plants for the waterside, naturalizing in grass, or growing in the partially shaded border.

DAPHNE - Garland Flower

These shrubs are of spreading habit and do not grow over 8 to 12 inches high; producing delicately perfumed rose-pink blossoms. The flowers completely cover the plant not only in spring but again in early autumn. As an edging plant in front of evergreens or shrubs, it is unequalled. It also forms a splendid low hedge along garden walks and around flower beds.

Culture. It prefers a sunny position in well-drained sandy soil. In order to keep the evergreen foliage perfect, protect it with a little straw during the coldest part of the winter. The plants will withstand temperatures as low as 10 below zero. Water sparingly in summer. Daphnes will not grow well in cold, poorly drained soil.

IRIS KAEMPFERI - Japanese Iris

Iris Kaempferi belong to the most magnificent of our garden flowers, a field of them in bloom is a most gorgeous sight. Even a single plant growing on the edge of a pool or stream never fails to bring forth favorable comment. The foliage is also very ornamental.

Culture. Late plantings should be protected by a light covering of straw or leaves after the ground is permanently frozen to prevent roots from being heaved out of ground by frost. Plant in spring or September and October. Avoid all lime.

ONCOCYCLUS IRISES and REGELIA-CYCLUS HYBRID IRISES

These remarkable and little known Irises are perfectly hardy to our coldest winter weather. It is advisable to give them the protection of a cold frame so they can be covered and allowed to die down after they have finished flowering, at which time they require a period of rest. This is accomplished by withholding all moisture throughout the entire summer by means of the protection of a cold frame. Given this treatment, they flower profusely. Where only a few are grown, the same results may be accomplished by potting them, burying the pots in the fall, where they are left until after flowering season; then the pots may be lifted and put away to dry. Or they may be dug up in July and stored in dry peat or dry sand for the summer and replanted in October. The best soil is a combination of sand and ordinary garden soil with a liberal percentage of peat mixed in and some bone meal for fertilizer. The extra care given them is very worth while because the loveliness of their flowers equals that of Orchids.

AUTUMN-FLOWERING IRIS PUMILA

Flowering Two or More Times Each Season

These autumn-flowering Irises have two or more normal flowering seasons each year. They blossom in the spring along with other early flowering varieties and again in the autumn, beginning in September and continuing until killed by heavy frosts. Some of them also flower intermittently throughout the year.

| Black Magic | <i>Each \$1.00, Doz. \$10.00</i> |
| It produces from 3 to 6 flowering stalks to each plant in September, as well as flowering in May. It is more free flowering in September than almost any Iris is during the regular season. It also is the largest and tallest of all the fall bloomers, being about 30 inches high. The flower is almost black. | |

They begin to flower quite early in the spring with the earliest miniatures and have a long spring flowering season. They also have an equally long autumn flowering season. We have had them in bloom from September until the middle of December in a favorable year. | |
| Lieut. Chavagnac | <i>Each \$0.35, Doz. \$3.50</i> |

Iris Germanica - German or Flag Iris

There are so many fine Irises introduced each year that it is very difficult to pick out the best. However, in this list will be found those that are universally hailed as wonderful improvements, or have already proven their claims as superfine Irises. All of these varieties are definite improvements over older ones of similar coloring, or are

of new and novel shades. "S" denotes the Standards or upper petals; "F", the Falls or lower petals.

Culture. Iris will grow in any good soil and under almost any conditions. They like lime and should be divided and reset every third year.

- Alta California** *Each \$0.50, Doz. \$5.00*
Holds its place as one of the most worth while and sensational Iris grown. It is tallest of all the new yellow Iris, and its branching qualifies it for "A" rating either as an individual stalk or as mass bloom. Yellow Iris have long been recognized as being the "spark" that brings out the fullest beauty of any Iris garden, and Alta California serves this purpose to perfection.
- Anne Marie Cayeux** *Each \$0.35, Doz. \$3.50*
One of the best light blends. A French introduction, given an Award of Merit by National Horticultural Society in France. S. pinkish lilac, flushed gray; F. metallic blue over gray; the "iridescent colorings of a pigeon's throat" to use originator's description.

A new "black" Iris that is gorgeously deep in tone. S. deep fluorite violet; F. deeper fluorite violet, with black veins, and so very velvety that at some angles they are absolutely black. One of the most beautiful and appropriately named, as the entire flower seems to be cut out of velvet and the color is a deep intense blue.

Papaver Orientale - Oriental Poppy

Oriental Poppies are the regal representatives of this popular genus, growing 3 to 3½ feet high, and far surpassing in splendor of bloom all the annual kinds. For a gorgeous display of rich and brilliant coloring nothing equals them during their period of flowering in May and June, and whether planted singly or in masses their large flowers and freedom of bloom render them conspicuous in any position.

Culture. Almost any kind of soil suits them, but they do best in deep, rich loam. Set the plants out in the fall or early spring before the first of May, 12 inches apart. Give them water occasionally during dry spells in the early part of the season. Mulch with dry litter to prevent crown rot in the fall; and they will increase in size and floriferousness for several years. The proper planting season for field-grown roots of Poppies is during the last of August, September and October. In spring, strong plants are supplied in pots to insure success.

Pyrethrum - Colored Marguerite or Painted Daisy

They produce showy flowers of all shades of color, except blue and yellow, freely on long stems throughout spring, which are of inestimable value for cutting. They grow in neat, compact tufts, and have elegant, finely cut foliage, which adds to the attractiveness of the plants.

Culture. Plenty of well-rotted manure should be freely mixed with the soil before planting. The position, too, must be a sunny one. The best time to plant is in spring; early fall planting is also very successful. Grow them in groups of not less than three plants, planted a foot to 15 inches apart. In dry weather give copious supplies of water. As soon as the first flowers have faded, cut the flowering stems back to their base. Every third year divide and replant in early spring.

GIANT CLIMBER—ROSA SETIGERA HYBRID by HORVATH

Color of Flower: Clear, deep rose-pink of same shade as Dame Edith Helen. The flowers are huge, fully 5 to 6 inches across when fully open. Slow in opening, lasting a long time. The flowers, though large, are refined and equal the finest Hybrid Tea Rose. Flowers are produced abundantly on spur branches both on main stock and laterals, 1 to 2 feet long. They are stiff and bear their heavy load without bending. Flowers do not droop, having a very stiff neck, and have from 50 to 55 petals. The appearance of the plant is one of noble ruggedness. Without a doubt the finest pink large-flowered climber to date.

Foliage: The rich, shining, bronzy green leaves are larger than those of the Mahonia or Oregon Grape and are ornamental in themselves.

Hardiness: Hardy without protection in the Temperate Zone. Can be successfully grown with protection in the colder regions where growing Roses heretofore has not been possible or exceedingly difficult.

Size of Plant: Ultimate height 14 to 15 feet.

Hardiness: Hardy without protection in the Temperate Zone. Can be successfully grown with protection in the colder regions where growing Roses heretofore has not been possible or exceedingly difficult.

A very hardy climber of robust growth. Disease resistant and exceedingly free blooming. The pure white individual flowers are often 2 inches in diameter and occur in large clusters. It is especially valuable where purity as well as profusion of bloom is essential. In addition we believe it to be the most fragrant of the Climbing Roses. The foliage is light and shiny green. PERPETUAL FLOWERING ROSE—HORVATH HYBRID

Intercross of ROSA MULTIFLORA X ROSA CANINA. Recrossed with Horvath's Improved HORTULANUS BUDDE

Color of Flower: Glowing cherry-red with orange center, vividly brilliant and sparkling to the point of being compelling. The flower reflects a fiery orange glow. Blooms profusely, singly and in clusters the entire summer. The flowers have from 30 to 36 petals. The shape and form of the flowers of this variety must not be compared with those of the Hybrid Tea Roses. Its size, however, permits it to be grown in the conventional Rose bed. Here is a variety of rugged habit, stronger growth, and should be planted by those who have despaired of growing H. T. Roses.

Foliage: Glaucous green and healthy. Seldom affected by black spot and other Rose maladies.

Hardiness: Hardy without protection in the Temperate Zone. Can be successfully grown with protection in the colder regions where growing Roses heretofore has not been possible or exceedingly difficult.

Size of Plant: Ultimate height 24 to 30 inches. Habit rather spreading to dwarf, forming a compact bush 18 to 24 inches wide.

Buff King (Rights Reserved)

Each \$2.00, 12 \$20.00

Foliage: Glaucous green and healthy. Seldom affected by black spot or other Rose maladies.

Hardiness: Hardy without protection in the Temperate Zone. Can be successfully grown with protection in the colder regions where growing Roses heretofore has not been possible or exceedingly difficult.

Size of Plant: Ultimate height 10 to 12 feet. Canes are very plentiful which is in part responsible for the tremendous amount of flowers produced.

The Polyantha or Baby Roses are very popular for edging and for bedding purposes. The plants grow into shapely, compact bushes about 12 to 18 inches high and they are covered with a great mass of flowers from early in the season until severe frost destroys their beauty. The blooms, though small, are very effective, as they are arranged in showy trusses that accentuate their rich and beautiful coloring.

A profuse and continuous bloomer with small ovoid buds splashed carmine, and lovely, double, long lasting, fragrant blooms of an appealing golden orange color. The flowers combine into showy clusters carried on long stems, and they are set against a mass of glossy green foliage.

Climbing Roses

Climbing Roses require no pruning in the spring beyond cutting out of very old or dead wood, and the shortening of the laterals and long canes to make the growth conform to the space to be covered; but a severe pruning in July, directly after they have finished flowering, is beneficial. Cutting away at that time all old flowering wood will encourage a vigorous growth, which will give an abundance of flowers the following season.

We offer on this page a selection of eighteen of the most modern Hardy Climbing and Rambler Roses.

Albertine *Each \$0.75, Doz. \$7.50*
Midseason. Coppery pink. Double flowers with large petals, coppery chamois inside, reverse bright salmon turning to coppery pink.

Bess Lovett *Each \$0.70, Doz. \$7.00*
Large, fairly full flowers of light crimson-red, cup-shaped, and borne in long-stemmed clusters suitable for cutting; sweetly fragrant. Plant very strong, exceedingly free flowering, with fine, glossy foliage almost immune to disease.

Blaze *Each \$1.00, Doz. \$10.00*
(U. S. Plant Patent No. 10.) Hardy everblooming Climbing Rose which inherits the blazing color of Paul's Scarlet Climber and the everblooming habit of Gruss on Teplitz, thus combining the most attractive features of both its parents. It is a very vigorous climbing variety which will grow to considerable height.

It is a cross between Paul's Scarlet and American Pillar, and like its parents is of vigorous growth, perfectly hardy, producing its large flowers, similar in size and form to Paul's Scarlet, profusely in strong trusses of from 8 to 12 flowers each, but in color a rich lively pink.

We consider this the best hardy yellow climber.

HARDY HYBRID PERPETUAL ROSES

The varieties listed below are unquestionably the best that can be selected in the Hybrid Perpetual class, which, before the development of the Hybrid Teas, was the most popular type for garden planting, and even now they dare not be overlooked, but should be used extensively in conjunction with the other sorts, and especially so in localities where the hardiness of the Hybrid Tea varieties has not been established.

Miniature Rose

ROSA ROULETTI

Each \$0.50, Three \$1.10, Doz. \$3.30, 100 \$20.00

Miniature Rose. Probably one of the old Lawrenceana Roses popular a century or more ago. After being lost to cultivation for many years, a plant was found growing in an Alpine window-garden by M. Correvon, the Swiss rock garden authority, just a few years ago. It is rapidly attaining popularity as a rock garden "gem" and as an edging plant in front of Rose beds. The plant grows about 6 inches tall in bushy form, is healthy and hardy and blooms from early summer until frost. The tiny, rose-pink, quite double flowers are less than an inch in diameter. A real treasure.

It may also be grown in the house without difficulty, blooming constantly. Charming little plant for a sunny window.

A New Barberry

Berberis Mentorensis Makes a Better Hedge

Berberis Mentorensis (Plant Patent No. 99) is the result of a cross between Barberry Thunbergi and Barberry Julianae. It has very rugged, strong, upright growing branches and quite formidable thorns. Its foliage is heavy and thick and of perfect color—a green as dark as the Japanese Yew.

In Northern Ohio the leaves remain green until after the holidays, are dropped during the late winter, and new foliage appears early in April. Plants growing south of here retain their foliage much longer. In southern parts of the country, Berberis Mentorensis is evergreen.

Its most valuable attribute is its ability to withstand heat and drought. Few other shrubs or hedge plants are able to go without water and withstand intense heat as Barberry Mentorensis and look as well. During the hottest weather there is never any sign of wilting or burning, much to the amazement of everyone.

Upright growth; easy upkeep (requires really no pruning), and its tenacious foliage, more than compensate for the lack of berries. We heartily recommend Berberis Mentorensis to you and claim it to be the best moderately priced and perfectly hardy hedge plant to date.

Mentorensis does not rust or discolor in hot, dry weather.

First—it is evergreen practically the year around. Think what that means.

Second—its sturdy, erect growth carries a thick dark green foliage right down to the ground. Is never bare-legged.

Third—when used for a hedge, its thorny, strong growth forms a formidable barrier to man or beast.

Fourth—needs no pruning. It is of erect growth which becomes dense when the plant is three or four years old. No upkeep! No pruning!

Fifth—combined in a foundation planting with evergreens, it provides a beautiful and artistic contrast at very small expense and without elaborate preparation of soil.

Sixth—is not "choosy" about where it grows. No matter if you can't make other broad-leaf evergreens, such as Azaleas and Rhododendrons, thrive in your soil, this new Barberry will. It is equally at home whether it is acid or alkaline soil.

Wayside Gardens Plant Food

Contains no fillers or useless bulk. One of the finest organic plant foods obtainable. Made from an Old English formula. For BULBS, LAWNS, and FLOWER GARDENS.

AN English gardener in charge of one of that country's finest estates, once said to us about their lawns: "We do not treat our lawns like a hayfield, but like a permanent garden." When questioned more closely, he told us about his objection to chemical fertilizers for lawns or permanent gardens, claiming that it was not the quantity of grass that was cut off a lawn each week, but what really matters is the density and health of the grass plants which make a carpet-like turf. "Chemical fertilizers are fine for farmers who want to grow hay," he said, "but the man who wants a real lawn better use a properly balanced organic plant food."

Another bit of information was his advice on fall fertilization. Apply organic plant food in October or November he advises. During the winter and early spring all nutriment sink deeply into the soil for the grass or plant roots to go after. That's also where the moisture is. Avoid watering so much in summer he said. If you use chemical fertilizers, watering must be done to prevent burning.

Because organic plant food disintegrates slowly, it is excellent to use in bulb plantings as well as in Rose beds, or Hardy Plant borders.

Wayside Gardens Organic Plant Food is made according to an old and tried English formula. We know it's tip-top because we use it exclusively on the millions of young plants we grow each year. It costs more than most chemical

fertilizers because it is more expensive to make. We don't put in any fillers to help make cheap, worthless bulk. You pay for and get nothing but plant food. You don't need so much to get the lasting results you want. We also know we can't charge more than it is worth; competition does not permit.

Wayside Gardens Special Plant Food is easy to use. The directions are simple. If your garden is an established one, apply twice a year, March 1st and October 1st. Use 15 to 25 pounds for top dressing a space of 500 square feet for Hardy Plants, Rock Plants, Roses, Annuals, and other flowering plants, shrubs, and bulbs.

In making a new garden, double the amount and mix with the soil. Planting may be done at once. No burning is possible. For old lawns, use 10 to 25 pounds for top dressing 500 square feet. In making new lawns, use double the amount and mix with the soil. Seeding and bulb planting may be done at once. No burning effect will result.

For potted plants, a 3-inch pot full of the food, mixed with a bushel of soil, will give you splendid results.

50 lbs., \$4.00; 100 lbs., \$7.00; 500 lbs., \$25.00; 2000 lbs., \$90.00.

Full directions in every bag.

Can only be obtained direct from Wayside Gardens.

Garden Building-Blox

An Indispensable Help In Laying Out New Gardens and Making Old Ones Better

There is no end of more or less good books on gardens, how to plan and plant them. But never has there been a real honest-to-goodness, sizeable, easy-to-follow plan book, to help make a flower garden. One adaptable to all size grounds, little or big. One applying to gardens in New York or Georgia, as well as in Minnesota. One that covers gardens for shady, sunny

and moist locations. One that tells you how to successfully have pink, yellow and blue gardens. One that shows you how easy it is to make sure of constant blooms the season through. One that will not alone help you lay out a new garden, but show you easy, satisfactory ways of improving an old garden. Also how to shift plants about to secure more pleasing effects.

GENEROUS SIZE

It is not a book of little plans with print so small you have to squint to read it. It rather is a portfolio of generous-sized plans, same as an expert landscape architect would submit. It shows you exactly what plants to plant, how many, and just where for best results. The fourteen pages of this Garden Building Blox Portfolio are 18 by 24 inches.

FLEXIBILITY

Each plan is laid out in a series of planting spaces or Blox. Each is complete in itself. For small spaces you can use one or two Blox. For larger spaces, more. The design selected by you can be carried out for a large or small garden. It gives the owner of a small garden the expert information furnished by the landscape architect engaged to develop the large estate.

INSURES RIGHT PLANTING

It makes sure the planting of the right plants in the right place,

whether Annuals, Perennials, Bulbs, or Roses. Insures you against that most exasperating thing of tall growing plants hiding low ones. Insures you against color clashes.

PLANNING AHEAD

Also makes possible the planning of your entire garden ahead for several years to come, and then carrying out certain parts each year as you like, until completed. In short, it takes the chance, the gamble, out of gardening. Makes it the complete joy it can so easily be.

ITS NOMINAL COST

As you can well imagine, the preparation of this portfolio was costly, covering several months of careful work. Despite which, its price is only \$2.00. However, **to our customers** we are offering it for \$1.00, which barely covers cost of printing and mailing. Your money refunded if you are not satisfied.

ORDERING

Send your order for Building Blox along at once. It requires no knowledge to read these simple plans, follow the advice given and you will avoid the unnecessary mistakes usually made by amateurs. Send \$1.00 in most convenient way for you. Cash remittance perfectly safe.
